Snow Capital Focused Value Fund

Class A Shares (Ticker Symbol: SFOAX)

Institutional Class Shares (Ticker Symbol: SFOIX)

Snow Capital Dividend Plus Fund

Class A Shares (Ticker Symbol: SDPAX)

Institutional Class Shares (Ticker Symbol: SDPIX)

This Statement of Additional Information (“SAI”) provides general information about the Snow Capital Focused Value Fund (the “Focused Value Fund”) and the Snow Capital Dividend Plus Fund (the “Dividend Plus Fund”) (each, a “Fund,” and collectively, the “Funds” or “Snow Capital Funds”), each a series of Trust for Professional Managers (the “Trust”). This SAI is not a prospectus and should be read in conjunction with the Funds’ current prospectus dated October 28, 2016 (the “Prospectus”), as supplemented and amended from time to time, which is incorporated herein by reference.

Each Fund previously operated as a series of 360 Funds. On May 11, 2016, the Board of Trustees of 360 Funds approved an Agreement and Plan of Reorganization providing for, among other things, the transfer of the assets and stated liabilities of each Fund’s predecessor fund of the same name within the 360 Funds (each, a “Predecessor Fund” and together, the “Predecessor Funds”). The Predecessor Funds’ audited financial statements for the fiscal year ended February 29, 2016 are incorporated herein by reference from the Predecessor Funds’ 2016 Annual Report to Shareholders. To obtain a free copy of the Prospectus and/or the Predecessor Funds’ 2016 Annual Report to Shareholders, please write or call (toll-free) the Funds at the address or telephone number below, or visit the Funds’ website at www.snowfunds.com:

The Trust

The Trust is a Delaware statutory trust organized on May 29, 2001, and is registered with the Securities and Exchange Commission (“SEC”) as an open-end management investment company. Each Fund is one series, or mutual fund, formed by the Trust. Each Fund (other than the Focused Value Fund) is a diversified series and has its own investment objective and policies. The Focused Value Fund is a non-diversified series. As of the date of this SAI, shares of thirty-five other series of the Trust are offered in separate prospectuses and statements of additional information. The Trust may start additional series and offer shares of a new fund or share class under the Trust at any time.

The Trust is authorized to issue an unlimited number of interests (or shares). Interests in the Funds are represented by shares of beneficial interest each with a par value of \$0.001. Each share of the Trust has equal voting rights and liquidation rights, and is voted in the aggregate and not by the series or class of shares except in matters where a separate vote is required by the Investment Company Act of 1940, as amended (the “1940 Act”), or when the matters affect only the interest of a particular series or class of shares. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular class. The Trust does not normally hold annual meetings of shareholders. The Trust’s Board of Trustees (the “Board” or the “Board of Trustees”) shall promptly call and give notice of a meeting of shareholders for the purpose of voting upon removal of any trustee when requested to do so in writing by shareholders holding 10% or more of the Trust’s outstanding shares.

With respect to the Funds, the Trust may offer more than one class of shares. The Trust has adopted a multiple class plan pursuant to Rule 18f-3 under the 1940 Act, detailing the attributes of each share class of the Funds. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class. Each Fund offers two classes of shares: Class A and Institutional Class.

Each share of a Fund represents an equal proportionate interest in the assets and liabilities belonging to the Fund and is entitled to such distributions out of the income belonging to the Fund as are declared by the Board of Trustees. The Board of Trustees has the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series so long as the proportionate beneficial interests in the assets belonging to that series and the rights of shares of any other series are in no way affected. Additionally, in the case of any liquidation of a series, the holders of shares of the series being liquidated are entitled to receive a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series or class are borne by that series or class. Any general expenses of the Trust not readily identifiable as belonging to a particular series or class are allocated by, or under the direction of, the trustees on the basis of relative net assets, the number of shareholders or another equitable method. No shareholder is liable to further calls or to assessment by the Trust without his or her express consent.

The assets of a Fund received for the issue or sale of its shares, and all income, earnings, profits and proceeds thereof, subject only to the rights of creditors, shall constitute the underlying assets of the Fund. In the event of the dissolution or liquidation of a Fund, the holders of shares of the Fund are entitled to share pro rata in the net assets of the Fund available for distribution to shareholders.

Snow Capital Management L.P. (the “Adviser”) serves as the investment adviser to the Funds. The Adviser also serves as the investment adviser to the Snow Capital Small Cap Value Fund and the Snow Capital Opportunity Fund, each a series of the Trust, which are offered in a separate Prospectus and SAI (together with the Funds, the “Snow Capital Funds”).

Investment Policies, Strategies and Associated Risks

Investment Objective

The investment objective of the Focused Value Fund is the long-term growth of capital and the Dividend Plus Fund is long-term growth of capital and income. The Funds’ investment objectives may be changed without the approval of a Fund’s shareholders upon 60 days’ written notice to shareholders. A Fund may not make any change to its investment policy of investing at least 80% of net assets in investments suggested by the Fund’s name without first changing the Fund’s name and providing shareholders with at least 60 days’ prior written notice.

Diversification

The Dividend Plus Fund is diversified. Under applicable federal laws, to qualify as a diversified fund, a Fund, with respect to 75% of its total assets, may not invest more than 5% of its total assets in any one issuer and may not hold more than 10% of the securities of one issuer. The remaining 25% of the Fund’s total assets does not need to be “diversified” and may be invested in securities of a single issuer, subject to other applicable laws. The diversification of the Fund’s holdings is measured at the time the Fund purchases a security. However, if the Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund’s total assets due to movements in the financial markets. If the market affects several securities held by the Fund, the fund may have a greater percentage of its assets invested in securities of fewer issuers. Because the Fund is diversified, the Fund is less subject to the risk that their performance may be hurt disproportionately by the poor performance of relatively few securities despite the Fund qualifying as a diversified Fund under applicable federal laws.

The Focused Value Fund is non-diversified. Under applicable federal laws, the diversification of the Focused Value Fund’s holdings is measured at the time the Fund purchases a security. However, if the Focused Value Fund purchases a security and holds it for a period of time, the security may become a larger percentage of the Fund’s total assets due to movements in the financial markets. If the market affects several securities held by the Focused Value Fund, the Fund may have a greater percentage of its assets invested in securities of fewer issuers. Because the Focused Value Fund is non-diversified, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities.

Investment Strategies and Related Risks

There is no assurance that a Fund will achieve its investment objective. The following discussion supplements the description of the Funds’ principal investment strategies set forth in the Prospectus. Except for the fundamental investment restrictions listed below (see “Investment Restrictions”), the Funds’ investment strategies and policies are not fundamental and may be changed by sole action of the Board of Trustees, without shareholder approval. While the Funds are permitted to hold securities and engage in various strategies as described hereafter, they are not obligated to do so.

Whenever an investment policy or investment restriction states a maximum percentage of a Fund’s assets that may be invested in any security, or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund’s acquisition or sale of such security or other asset. Accordingly, except with respect to borrowing and illiquid securities, any subsequent change in values, net assets or other circumstances will not be

considered when determining whether an investment complies with a Fund's investment policies and investment restrictions set forth herein or in the Prospectus. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by a Fund, the Fund may receive stock, real estate or other investments that the Fund would not, or could not, buy. If this happens, a Fund will sell such investments as soon as practicable while trying to maximize the return to its shareholders. Please note, however, that the guidance referenced in the first two sentences of this paragraph does not apply to a Fund's investments in illiquid securities or the Fund's borrowing of money.

General Market Risks

The U.S. and international markets have experienced significant volatility in recent years. As a result, the securities markets have experienced substantially lower valuations, reduced liquidity, price volatility, credit downgrades, and increased likelihood of default and valuation difficulties, all of which may increase the risks of investing in the securities held by the Funds.

Equity Securities

The Funds may invest in equity securities. An equity security (such as a stock, partnership interest or other beneficial interest in an issuer) represents a proportionate share of the ownership of a company; its value is based on the success of the company's business, any income paid to stockholders, the value of its assets and general market conditions. Common stocks and preferred stocks are examples of equity securities. Equity securities, such as common stocks, represent shares of ownership of a corporation. Preferred stocks are equity securities that often pay dividends at a specific rate and have a preference over common stocks in dividend payments and liquidation of assets. Some preferred stocks may be convertible into common stock. Convertible securities are securities (such as debt securities or preferred stock) that may be converted into or exchanged for a specified amount of common stock of the same or different issuer within a particular period of time at a specified price or formula.

The Funds may invest in securities of companies of any size. The risks of investing in companies in general include business failure and reliance on erroneous reports. To the extent a Fund is invested in the equity securities of small- or medium-size companies, directly or indirectly, it will be exposed to the risks of smaller sized companies. Small- and medium-size companies often have narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies. Furthermore, those companies often have limited product lines or services, markets, or financial resources, or are dependent on a small management group. In addition, because these securities are not well-known to the investing public, do not have significant institutional ownership, and are followed by relatively few security analysts, there will normally be less publicly available information concerning these securities compared to what is available for the securities of larger companies. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, can decrease the value and liquidity of securities held by a fund. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of a Fund's portfolio.

Preferred Stock

Preferred stock is a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Preferred stock has preference over common stock in the receipt of dividends and in any residual assets after payment to creditors should the issuer be dissolved. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.

Other Investment Companies

Each Fund may invest its assets in shares of other investment companies, including money market funds or exchange-traded funds (“ETFs”). Each Fund may invest in other investment companies that invest in equity securities as a principal investment strategy. As principal investment strategy for the Focused Value Fund, and as a non-principal investment strategy for the Dividend Plus Fund, each Fund may invest in other investment companies that invest in debt securities. A Fund’s investments in money market funds may be used for cash management purposes and to maintain liquidity in order to satisfy redemption requests or pay unanticipated expenses. Each Fund limits its investments in securities issued by other investment companies in accordance with the 1940 Act. Section 12(d)(1) of the 1940 Act precludes a Fund from acquiring: (i) more than 3% of the total outstanding shares of another investment company; (ii) shares of another investment company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) shares of another registered investment company and all other investment companies having an aggregate value in excess of 10% of the value of the total assets of the Fund. However, Section 12(d)(1)(F) of the 1940 Act provides that the provisions of paragraph 12(d)(1) shall not apply to securities purchased or otherwise acquired by a Fund if: (i) immediately after such purchase or acquisition not more than 3% of the total outstanding shares of such investment company is owned by the Fund and all affiliated persons of the Fund; and (ii) the Fund has not offered or sold, and is not proposing to offer or sell its shares through a principal underwriter or otherwise at a public or offering price that includes a sales load of more than 1 1/2%. Rule 12d1-3 under the 1940 Act provides that a Fund relying on Section 12(d)(1)(F) may offer or sell any securities it issues through a principal underwriter or otherwise at a public offering price not including a sales load of more than 1 1/2% of any sales charge and service fees charged do not exceed the limits set forth in FINRA Rule 2830.

If a Fund invests in investment companies, including ETFs, pursuant to Section 12(d)(1)(F), it must comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will either seek instruction from the Fund’s shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of such security. In addition, an investment company purchased by a Fund pursuant to Section 12(d)(1)(F) shall not be required to redeem its shares in an amount exceeding 1% of such investment company’s total outstanding shares in any period of less than thirty days. In addition to the advisory and operational fees a Fund bears directly in connection with its own operation, the Fund also bears its pro rata portion of the advisory and operational expenses of each other investment company.

Exchange-Traded Funds

Each share of an ETF represents an undivided ownership interest in the portfolio of securities held by that ETF. An ETF is an investment company that offers investors a proportionate share in a portfolio of stocks, bonds, commodities, currencies or other securities. Like individual equity securities, ETFs are traded on a stock exchange and can be bought and sold throughout the day.

Traditional ETFs attempt to achieve the same investment return as that of a particular market index. To mirror the performance of a market index, an ETF invests either in all of the securities in a particular index in the same proportion that is represented in the index itself or in a representative sample of securities in a particular index in a proportion meant to track the performance of the entire index. Such ETFs generally do not buy or sell securities, except to the extent necessary to conform their portfolios to the corresponding index. Because such ETFs have operating expenses and transaction costs, while a market index does not, they typically will be unable to match the performance of the index exactly. Alternatively, some ETFs use active investment strategies instead of tracking broad market indices and, as a result, may incur greater operating expenses and transactions costs than traditional ETFs. Investments in ETFs are investments in other investment companies. (See “Other Investment Companies,” above.)

ETFs generally do not sell or redeem their shares for cash, and most investors do not purchase or redeem shares directly from an ETF at all. Instead, the ETF issues and redeems its shares in large blocks (typically 50,000 of its shares) called “creation units.” Creation units are issued to anyone who deposits a specified portfolio of the ETF’s underlying securities, as well as a cash payment generally equal to accumulated dividends on the securities (net of expenses) up to the time of deposit, and creation units are redeemed in kind for a portfolio of the underlying securities (based on the ETF’s NAV) together with a cash payment generally equal to accumulated dividends as of the date of redemption. Most ETF investors, however, purchase and sell ETF shares in the secondary trading market on a securities exchange, in lots of any size, at any time during the trading day. ETF investors generally must pay a brokerage fee for each purchase or sale of ETF shares, including purchases made to reinvest dividends.

Because ETF shares are created from the securities of an underlying portfolio and can be redeemed into the securities of an underlying portfolio on any day, arbitrage traders may move to profit from any discrepancies between the market price of the ETF’s shares in the secondary market and the NAV per share of the ETF’s portfolio, which helps to close the price gap between the two. Of course, because of the forces of supply and demand and other market factors, there may be times when an ETF share trades at a premium or discount to its NAV.

The Funds intend to be long-term investors in ETFs and do not intend to purchase and redeem creation units to take advantage of short-term arbitrage opportunities, with the exception of the purchase and redemption of creation units of inverse ETFs, discussed below. However, the Funds may redeem creation units for the underlying securities (and any applicable cash), and may assemble a portfolio of the underlying securities and use it (and any required cash) to purchase creation units, if the Adviser believes it is in a Fund’s best interest to do so. The Funds’ ability to redeem creation units may be limited by the 1940 Act, which provides that ETFs will not be obligated to redeem shares held by the Funds in an amount exceeding one percent of their total outstanding securities during any period of less than 30 days.

The Funds will invest in ETF shares only if the ETF is registered as an investment company under the 1940 Act (see “Other Investment Companies,” above). If an ETF in which the Funds invest ceases to be a registered investment company, the Funds will dispose of the securities of the ETF as soon as practicable while trying to maximize the return to the Funds’ shareholders. Furthermore, in connection with their investment in ETF shares, the Funds will incur various costs. The Funds may also realize capital gains or losses when ETF shares are sold, and the purchase and sale of the ETF shares may include a brokerage commission that may result in costs. In addition, the Funds are subject to other fees as an investor in ETFs. Generally, those fees include, but are not limited to, director/trustee fees, operating expenses, licensing fees, registration fees and marketing expenses, each of which will be reflected in the NAV of ETFs and therefore the shares representing a beneficial interest therein.

There is a risk that the underlying ETFs in which the Funds invest may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Funds may invest are each granted licenses by agreement to use the indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may terminate if such license agreements are terminated. In addition, an ETF may terminate if its entire NAV falls below a certain amount.

The Funds may invest in inverse ETFs. An inverse ETF is an ETF that is constructed by using various derivatives for the purpose of profiting from a decline in the value of an underlying benchmark. Because inverse ETFs reset each day, their performance can quickly diverge from the performance of the underlying index or benchmark. If the Funds hold an inverse ETF for more than one day, it is possible that the Funds could suffer significant losses even if the long-term performance of the underlying index showed a gain. Inverse ETFs may be more costly than traditional ETFs, and may be less tax-efficient than traditional ETFs, in part because daily resets can cause the ETF to realize significant short-term capital gains that may not be offset by a loss. As a result of market price variance risk, it is possible that the price the Fund pays to invest in an inverse ETF is not truly reflective of the true value of such ETF.

Fixed-Income Securities

The Funds may invest in a wide range of fixed-income securities, which may include obligations of any rating or maturity. The Funds may invest in investment grade corporate debt securities and below investment grade corporate debt securities (commonly known as “junk bonds” or “high yield bonds”). Below investment grade debt securities include corporate high yield debt securities, zero-coupon securities, payment-in kind securities and separate trading of registered interest and principal of securities (“STRIPS”). Investment grade corporate bonds are those rated BBB or better by S&P Global Ratings (“S&P”) or Baa or better by Moody’s Investors Service, Inc. (“Moody’s”). Securities rated BBB by S&P are considered investment grade, but Moody’s considers securities rated Baa to have speculative characteristics. The Funds will not invest in securities that are rated below D by S&P or Moody’s. The Funds may hold a debt security rated below D if a downgrade occurs after the security has been purchased. The Funds may also invest in unrated debt securities.

Junk Bonds. Junk bonds generally offer a higher current yield than that available for investment grade issues. However, below investment grade debt securities involve higher risks, in that they are especially subject to adverse changes in general economic conditions and in the industries in which the issuers are engaged, to changes in the financial condition of the issuers and to price fluctuations in response to changes in interest rates. During periods of economic downturn or rising interest rates, highly leveraged issuers may experience financial stress that could adversely affect their ability to make payments of interest and principal and increase the possibility of default. In addition, the market for below investment grade debt securities has expanded rapidly in recent years, and its growth paralleled a long economic expansion. At times in recent years, the prices of many below investment grade debt securities declined substantially, reflecting an expectation that many issuers of such securities might experience financial difficulties. As a result, the yields on below investment grade debt securities rose dramatically, but such higher yields did not reflect the value of the income stream that holders of such securities expected, but rather, the risk that holders of such securities could lose a substantial portion of their value as a result of the issuers’ financial restructuring or default. There can be no assurance that such declines will not recur. The market for below investment grade debt issues generally is thinner and less active than that for higher quality securities, which may limit a Fund’s ability to sell such securities at fair value in response to changes in the economy or financial markets. Adverse publicity and investor perceptions, whether or not based on fundamental analysis, may also decrease the values and liquidity of below investment grade debt securities, especially in a thinly traded market. Changes by recognized rating services in their rating of a debt security may affect the value of these investments. A Fund will not necessarily dispose of a security when its rating is reduced below its rating at the time of purchase. However, the Adviser will monitor the investment to determine whether continued investment in the security will assist in meeting a Fund’s investment objective.

Corporate Debt Securities. Corporate debt securities are fixed-income securities issued by businesses to finance their operations, although corporate debt instruments may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities, with the primary difference being their maturities and secured or un-secured status. Commercial paper has the shortest term and is usually unsecured.

The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment grade or below investment grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that a fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

Zero-Coupon Securities. Zero-coupon securities make no periodic interest payments, but are sold at a deep discount from their face value. The buyer recognizes a rate of return determined by the gradual appreciation of the security, which is redeemed at face value on a specified maturity date. The discount varies depending on the time remaining until maturity, as well as market interest rates, liquidity of the security, and the issuer's perceived credit quality. If the issuer defaults, the holder may not receive any return on its investment. Because zero-coupon securities bear no interest and compound semiannually at the rate fixed at the time of issuance, their value generally is more volatile than the value of other fixed-income debt securities. Since zero-coupon bondholders do not receive interest payments, when interest rates rise, zero-coupon securities fall more dramatically in value than bonds paying interest on a current basis. When interest rates fall, zero-coupon securities rise more rapidly in value because the bonds reflect a fixed rate of return. An investment in zero-coupon and delayed interest securities may cause a Fund to recognize income and make distributions to shareholders before it receives any cash payments on its investment. As a result, a Fund may have to dispose of its portfolio investments under disadvantageous circumstances in order to generate sufficient cash to satisfy the distribution requirements for maintaining its status as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code").

Unrated Debt Securities. A Fund may also invest in unrated debt securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their bonds. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed to determine whether to purchase unrated bonds.

Convertible Securities

The Funds may invest in convertible securities. A convertible security is a fixed-income security (a debt instrument or a preferred stock) which may be converted at a stated price within a specified period of time into a certain quantity of the common stock of the same or a different issuer. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. While providing a fixed-income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar non-convertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.

Warrants

Each Fund may invest a portion of its assets in warrants. A warrant gives the holder a right to purchase at any time during a specified period a predetermined number of shares of common stock at a fixed price. Unlike convertible debt securities or preferred stock, warrants do not pay a fixed coupon or dividend. Investments in warrants involve certain risks, including the possible lack of a liquid market for resale of the warrants, potential price fluctuations as a result of speculation or other factors and failure of the price of the underlying security to reach or have reasonable prospects of reaching a level at which the warrant can be prudently exercised (in which event the warrant may expire without being exercised, resulting in a loss of the Fund's entire investment therein).

Foreign Investments and Currencies

The Funds may invest in securities of foreign issuers that are not publicly traded in the United States. Each Fund may also invest in American Depositary Receipts ("ADRs") and European Depositary Receipts ("EDRs"), foreign securities traded on a national securities market, purchase and sell foreign currency on a spot basis and enter into forward currency contracts (see "Forward Currency Contracts," below).

Depositary Receipts. A Fund may invest its assets in securities of foreign issuers in the form of depositary receipts, such as ADRs and EDRs, which are securities representing securities of foreign issuers. A purchaser of unsponsored depositary receipts may not have unlimited voting rights and may not receive as much information about the issuer of the underlying securities as with a sponsored depositary receipt. Generally, ADRs, in registered form, are denominated in U.S. dollars and are designed for use in the U.S. securities markets, while EDRs, in bearer form, may be denominated in other currencies and are designed for use in European securities markets. ADRs are receipts typically issued by a U.S. bank or trust company evidencing ownership of the underlying securities. EDRs are European receipts evidencing similar arrangements. For purposes of the Funds' investment policies, ADRs and EDRs are deemed to have the same classification as the underlying securities they represent. Thus, an ADR or EDR representing ownership of common stock will be treated as common stock.

Risks of Investing in Foreign Securities. Investments in foreign securities involve certain inherent risks, including the following:

Political and Economic Factors. Individual foreign economies of certain countries may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, diversification and balance of payments position. The internal politics of certain foreign countries may not be as stable as those of the United States. Governments in certain foreign countries also continue to participate to a significant degree, through ownership interest or regulation, in their respective economies. Action by these governments could include restrictions on foreign investment, nationalization, expropriation of goods or imposition of taxes, and could have a significant effect on market prices of securities and payment of interest. The economies of many foreign countries are heavily dependent upon international trade and are accordingly affected by the trade policies and economic conditions of their trading partners. Enactment by these trading partners of protectionist trade legislation could have a significant adverse effect upon the securities markets of such countries.

Currency Fluctuations. The Funds may invest in securities denominated in foreign currencies. Accordingly, a change in the value of any such currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of a Fund's assets denominated in that currency. Such changes will also affect a Fund's income. The value of a Fund's assets may also be affected significantly by currency restrictions and exchange control regulations enacted from time to time.

Market Characteristics. The Adviser expects that many foreign securities in which the Funds invest will be purchased in over-the-counter markets or on exchanges located in the countries in which the principal offices of the issuers of the various securities are located, if that is the best available market. Foreign exchanges and markets may be more volatile than those in the United States. While growing in volume, they usually have substantially less volume than U.S. markets, and the Funds' investments in foreign securities may be less liquid and more volatile than U.S. securities. Moreover, settlement practices for transactions in foreign markets may differ from those in United States markets, and may include delays beyond periods customary in the United States. Foreign security trading practices, including those involving securities settlement where Fund assets may be released prior to receipt of payment or securities, may expose the Funds to increased risk in the event of a failed trade or the insolvency of a foreign broker-dealer.

Legal and Regulatory Matters. Certain foreign countries may have less supervision of securities markets, brokers and issuers of securities, and less financial information available from issuers, than is available in the United States.

Taxes. The interest and dividends payable on certain of the Funds' foreign portfolio securities may be subject to foreign withholding taxes, thus reducing the net amount of income available for distribution to Fund shareholders.

Costs. To the extent that a Fund invests in foreign securities, its expense ratio is likely to be higher than those of investment companies investing only in domestic securities, since the cost of maintaining the custody of foreign securities is higher.

Emerging Markets. Some of the companies in which a Fund may invest may be located in developing or emerging markets, which entail additional risks, including less social, political and economic stability; smaller securities markets and lower trading volume, which may result in less liquidity and greater price volatility; national policies that may restrict the Fund's investment opportunities, including restrictions on investments in issuers or industries, or expropriation or confiscation of assets or property; and less developed legal structures governing private or foreign investment.

In considering whether to invest in the securities of a foreign company, the Adviser considers such factors as the characteristics of the particular company, differences between economic trends and the performance of securities markets within the U.S. and those within other countries, and also factors relating to the general economic, governmental and social conditions of the country or countries where the company is located. The extent to which a Fund will be invested in foreign companies and countries and depositary receipts will fluctuate from time to time within the limitations described in the Prospectus, depending on the Adviser's assessment of prevailing market, economic and other conditions.

Forward Currency Contracts. The Funds may enter into forward currency contracts in anticipation of changes in currency exchange rates. A forward currency contract is an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. For example, a Fund might purchase a particular currency or enter into a forward currency contract to preserve the U.S. dollar price of securities it intends to or has contracted to purchase. Alternatively, it might sell a particular currency on either a spot or forward basis to hedge against an anticipated decline in the dollar value of securities it intends to or has contracted to sell. Although this strategy could minimize the risk of loss due to a decline in the value of the hedged currency, it could also limit any potential gain from an increase in the value of the currency.

Short Sales

Each Fund may engage in short sales of securities representing up to 15% of its net assets, provided the securities are fully listed on a national securities exchange. In a short sale, a Fund sells a security it does not own, in anticipation of a decline in the market value of the security. To complete the transaction, a Fund must borrow the security to make delivery to the buyer. The Fund is then obligated to replace the security borrowed by purchasing it at the market price at the time of replacement. This price may be more or less than the price at which the security was sold by a Fund. The Funds will incur a loss on a short sale if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed security. The Funds will realize a gain if the security declines in price between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of the premium, dividends, interest or expenses a Fund may be required to pay in connection with the short sale.

Typically, a Fund will segregate liquid assets, which are marked-to-market daily, equal to the difference between (a) the market value of the securities sold short at the time they were sold short and (b) the value of the collateral deposited with the broker in connection with the short sale (not including the proceeds from the short sale). While the short position is open, a Fund must maintain segregated assets at such a level that the amount segregated plus the amount deposited with the broker as collateral equal the current market value of the securities sold short.

Options, Futures and Other Strategies

General. A Fund may use certain options (both traded on an exchange and over-the-counter ("OTC")), futures contracts (sometimes referred to as "futures") and options on futures contracts (collectively, "Derivative Instruments") as a substitute for a comparable market position in the underlying security, to attempt to hedge or limit the exposure of the Fund's position, to create a synthetic money market position, for certain tax-related purposes and to effect closing transactions.

The Funds expect to generate premiums from the writing of call options. A Fund will recognize short-term capital gains upon the expiration of an option that it has written. If a Fund enters into a closing transaction, the difference between the amount paid to close out its option position and the premium received for writing the option will be short-term capital gain or loss. Transactions involving the disposition of a Fund's underlying securities (whether pursuant to the exercise of a call option, put option or otherwise) will give rise to capital gains or losses. Due to the tax treatment of securities on which call options have been written, it is expected that most of the gains from the sale of the underlying securities held by a Fund will be short-term capital gains. Because the Funds do not have control over the exercise of the call options they write, such exercises or other required sales of the underlying stocks may force the Funds to realize capital gains or losses at inopportune times.

The Funds' transactions in options are subject to special and complex U.S. federal income tax provisions (including, in addition to the straddle tax rules described above, tax rules regarding constructive sales, wash sales and short sales) that may, among other things: (i) treat dividends that would otherwise constitute qualified dividend income as non-qualified dividend income; (ii) treat dividends that would otherwise be eligible for the corporate dividends-received deduction as ineligible for such treatment; (iii) disallow, suspend or otherwise limit the allowance of certain losses or deductions; (iv) accelerate income recognition to the Fund, (v) convert lower taxed long-term capital gain into higher taxed short-term capital gain or ordinary income; and (vi) convert an ordinary loss or deduction into a capital loss (the deductibility of which is more limited).

The use of Derivative Instruments is subject to applicable regulations of the SEC, the several exchanges upon which they are traded and the Commodity Futures Trading Commission (the "CFTC"). In addition, a Fund's ability to use Derivative Instruments will be limited by tax considerations. In addition to the instruments, strategies and risks described below and in the Prospectus, the Adviser may discover additional opportunities in connection with Derivative Instruments and other similar or related techniques. These new opportunities may become available as the Adviser develops new techniques, as regulatory authorities broaden the range of permitted transactions and as new Derivative Instruments or other techniques are developed. The Adviser may utilize these opportunities to the extent that they are consistent with a Fund's investment objectives and permitted by the Fund's investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below or in the Prospectus.

Special Risks. The use of Derivative Instruments involves special considerations and risks, certain of which are described below. Risks pertaining to particular Derivative Instruments are described in the sections that follow.

(1) Successful use of most Derivative Instruments depends upon the Adviser's ability to predict movements of the overall securities markets, which requires different skills than predicting changes in the prices of individual securities. The ordinary spreads between prices in the cash and futures markets, due to the differences in the natures of those markets, are subject to distortion. Due to the possibility of distortion, a correct forecast of stock market trends by the Adviser may still not result in a successful transaction. The Adviser may be incorrect in its expectations as to the extent of market movements or the time span within which the movements take place, which, thus, may result in the strategy being unsuccessful.

(2) Options and futures prices can diverge from the prices of their underlying instruments. Options and futures prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract, which

may not affect security prices the same way. Imperfect or no correlation also may result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, and from imposition of daily price fluctuation limits or trading halts.

(3) As described below, a Fund might be required to maintain assets as “cover,” maintain segregated accounts or make margin payments when it takes positions in Derivative Instruments involving obligations to third parties (e.g., Financial Instruments other than purchased options). If a Fund were unable to close out its positions in such Financial Instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expired or matured. These requirements might impair a Fund’s ability to sell a portfolio security or make an investment when it would otherwise be favorable to do so or require that the Fund sell a portfolio security at a disadvantageous time. A Fund’s ability to close out a position in a Derivative Instrument prior to expiration or maturity depends on the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the other party to the transaction (the “counter-party”) to enter into a transaction closing out the position. Therefore, there is no assurance that any position can be closed out at a time and price that is favorable to the Fund.

(4) Losses may arise due to unanticipated market price movements, lack of a liquid secondary market for any particular instrument at a particular time or due to losses from premiums paid by a Fund on options transactions.

Cover. Transactions using Derivative Instruments, other than purchased options, expose a Fund to an obligation to another party. A Fund will not enter into any such transactions unless it owns either (1) an offsetting (“covered”) position in securities or other options or futures contracts or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. The Funds will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with its custodian, U.S. Bank, N.A. (the “Custodian”), or another approved custodian, in the prescribed amount as determined daily.

Assets used as cover or held in an account cannot be sold while the position in the corresponding Derivative Instrument is open, unless they are replaced with other appropriate assets. As a result, the commitment of a large portion of a Fund’s assets to cover accounts could impede portfolio management or the Fund’s ability to meet redemption requests or other current obligations.

Options. The value of an option position will reflect, among other things, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment and general market conditions. Options that expire unexercised have no value. Options currently are traded on the Chicago Board Options Exchange (“CBOE”), the American Stock and Options Exchange (“AMEX”) and other exchanges, as well as the OTC markets.

By buying a call option on a security, a Fund has the right, in return for the premium paid, to buy the security underlying the option at the exercise price. By writing (selling) a call option and receiving a premium, the Fund becomes obligated during the term of the option to deliver securities underlying the option at the exercise price if the option is exercised. By buying a put option, a Fund has the right, in return for the premium, to sell the security underlying the option at the exercise price. By writing a put option, a Fund becomes obligated during the term of the option to purchase the securities underlying the option at the exercise price.

Because options premiums paid or received by a Fund are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities.

A Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, a Fund may terminate its obligation under a call or put option that it had written by purchasing an identical call or put option. This is known as a closing purchase transaction. Conversely, a Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option. This is known as a closing sale transaction. Closing transactions permit a Fund to realize profits or limit losses on an option position prior to its exercise or expiration.

Risks of Options on Securities. Exchange-traded options in the United States are issued by a clearing organization affiliated with the exchange on which the option is listed that, in effect, guarantees completion of every exchange-traded option transaction. In contrast, OTC options are contracts between a Fund and its counter-party (usually a securities dealer or a bank) with no clearing organization guarantee. Thus, when a Fund purchases an OTC option, it relies on the counter-party from whom it purchased the option to make or take delivery of the underlying investment upon exercise of the option. Failure by the counter-party to do so would result in the loss of any premium paid by a Fund as well as the loss of any expected benefit of the transaction.

A Fund's ability to establish and close out positions in exchange-traded options depends on the existence of a liquid market. However, there can be no assurance that such a market will exist at any particular time. Closing transactions can be made for OTC options only by negotiating directly with the counter-party or by a transaction in the secondary market if any such market exists. There can be no assurance that a Fund will in fact be able to close out an OTC option position at a favorable price prior to expiration. In the event of insolvency of the counter-party, a Fund might be unable to close out an OTC option position at any time prior to its expiration.

If a Fund were unable to effect a closing transaction for an option it had purchased, it would have to exercise the option to realize any profit. The inability to enter into a closing purchase transaction for a covered call option written by a Fund could cause material losses because the Fund would be unable to sell the investment used as cover for the written option until the option expires or is exercised.

Options on Indices. An index fluctuates with changes in the market values of the securities included in the index. Options on indices give the holder the right to receive an amount of cash upon exercise of the option. Receipt of this cash amount will depend upon the closing level of the index upon which the option is based being greater than (in the case of a call) or less than (in the case of put) the exercise price of the option. Some stock index options are based on a broad market index such as the S&P 500[®] Index, the NYSE Composite Index or the AMEX Major Market Index or on a narrower index such as the Philadelphia Stock Exchange Over-the-Counter Index.

Each of the exchanges has established limitations governing the maximum number of call or put options on the same index that may be bought or written by a single investor, whether acting alone or in concert with others (regardless of whether such options are written on the same or different exchanges or are held or written on one or more accounts or through one or more brokers). Under these limitations, option positions of all investment companies advised by the Adviser are combined for purposes of these limits. Pursuant to these limitations, an exchange may order the liquidation of positions and may impose other sanctions or restrictions. These position limits may restrict the number of listed options that a Fund may buy or sell.

Puts and calls on indices are similar to puts and calls on securities or futures contracts except that all settlements are in cash and gain or loss depends on changes in the index in question rather than on price movements in individual securities or futures contracts. When a Fund writes a call on an index, it receives a premium and agrees that, prior to the expiration date, the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the closing level of the index upon which the call is based is greater than the exercise price of the call. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call times a specified multiple (“multiplier”), which determines the total value for each point of such difference. When a Fund buys a call on an index, it pays a premium and has the same rights to such call as are indicated above. When a Fund buys a put on an index, it pays a premium and has the right, prior to the expiration date, to require the seller of the put, upon the Fund’s exercise of the put, to deliver to the Fund an amount of cash if the closing level of the index upon which the put is based is less than the exercise price of the put, which amount of cash is determined by the multiplier, as described above for calls. When a Fund writes a put on an index, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the closing level of the index and the exercise price times the multiplier if the closing level is less than the exercise price.

Risks of Options on Indices. If a Fund has purchased an index option and exercises it before the closing index value for that day is available, it runs the risk that the level of the underlying index may subsequently change. If such a change causes the exercised option to fall out-of-the-money, a Fund will be required to pay the difference between the closing index value and the exercise price of the option (times the applicable multiplier) to the assigned writer.

OTC Options. Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. While this type of arrangement allows a Fund great flexibility to tailor the option to its needs, OTC options generally involve greater risk than exchange-traded options, which are guaranteed by the clearing organization of the exchanges where they are traded.

Naked Put Options. A naked put option is a position in which a buyer writes a put option and has no position in the underlying stock. A naked put option may be used when a Fund expects the underlying stock to be trading above the strike price at the time of expiration. The potential for profit is limited to the amount of premium received. A Fund will benefit from a naked put option if the underlying stock is trading above the strike price at the time of the expiration of the put option and expires worthless. If this occurs, a Fund will keep the entire premium. A Fund could lose money if the price of the underlying stock went to zero. If the put is exercised against a Fund, the Fund will receive the underlying stock.

Bull and Bear Spread Options Strategies. Bull and bear spread options strategies are options strategies that seek maximum profit through the simultaneous purchase and sale of options, using either puts or calls, with each having the same expiration date. In a bull spread strategy, a Fund will purchase an option at a lower strike price, and will sell at a higher strike price. A Fund will make money from a bull spread options strategy when the price of the underlying security rises. In a bear spread strategy, the Fund will purchase an option at a higher strike price and sell at a lower strike price. A Fund will make money using a bear spread strategy when the price of the underlying security declines, and will lose money if the price of the underlying security rises.

Futures Contracts and Options on Futures Contracts. A futures contract obligates the seller to deliver (and the purchaser to take delivery of) the specified security on the expiration date of the contract. An index futures contract obligates the seller to deliver (and the purchaser to take) an amount of cash equal to a specific dollar amount times the difference between the value of a specific index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying securities in the index is made.

When a Fund writes an option on a futures contract, it becomes obligated, in return for the premium paid, to assume a position in the futures contract at a specified exercise price at any time during the term of the option. If a Fund writes a call, it assumes a short futures position. If it writes a put, it assumes a long futures position. When a Fund purchases an option on a futures contract, it acquires the right in return for the premium it pays to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put).

Whether a Fund realizes a gain or loss from futures activities depends upon movements in the underlying security or index. The extent of a Fund's loss from an unhedged short position in futures contracts or from writing unhedged call options on futures contracts is potentially unlimited. The Funds only purchases and sells futures contracts and options on futures contracts that are traded on a U.S. exchange or board of trade.

No price is paid upon entering into a futures contract. Instead, at the inception of a futures contract a Fund is required to deposit "initial margin" in an amount generally equal to 10% or less of the contract value. Margin also must be deposited when writing a call or put option on a futures contract, in accordance with applicable exchange rules. Unlike margin in securities transactions, initial margin does not represent a borrowing, but rather is in the nature of a performance bond or good-faith deposit that is returned to a Fund at the termination of the transaction if all contractual obligations have been satisfied. Under certain circumstances, such as periods of high volatility, a Fund may be required by an exchange to increase the level of its initial margin payment, and initial margin requirements might be increased generally in the future by regulatory action.

Subsequent "variation margin" payments are made to and from the futures commission merchant daily as the value of the futures position varies, a process known as "marking-to-market." Variation margin does not involve borrowing, but rather represents a daily settlement of a Fund's obligations to or from a futures commission merchant. When a Fund purchases an option on a futures contract, the premium paid plus transaction costs is all that is at risk. In contrast, when a Fund purchases or sells a futures contract or writes a call or put option thereon, it is subject to daily variation margin calls that could be substantial in the event of adverse price movements. If a Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

Purchasers and sellers of futures contracts and options on futures can enter into offsetting closing transactions, similar to closing transactions in options, by selling or purchasing, respectively, an instrument identical to the instrument purchased or sold. Positions in futures and options on futures contracts may be closed only on an exchange or board of trade that provides a secondary market. However, there can be no assurance that a liquid secondary market will exist for a particular contract at a particular time. In such event, it may not be possible to close a futures contract or options position.

Under certain circumstances, futures exchanges may establish daily limits on the amount that the price of a futures contract or an option on a futures contract can vary from the previous day's settlement price. Once that limit is reached, no trades may be made that day at a price beyond the limit. Daily price limits

do not limit potential losses because prices could move to the daily limit for several consecutive days with little or no trading, thereby preventing liquidation of unfavorable positions.

If a Fund were unable to liquidate a futures contract or an option on a futures position due to the absence of a liquid secondary market or the imposition of price limits, it could incur substantial losses. A Fund would continue to be subject to market risk with respect to the position. In addition, except in the case of purchased options, a Fund would continue to be required to make daily variation margin payments and might be required to maintain cash or liquid assets in an account.

Risks of Futures Contracts and Options Thereon. The ordinary spreads between prices in the cash and futures markets (including the options on futures markets), due to differences in the natures of those markets, are subject to the following factors, which may create distortions. First, all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions, which could distort the normal relationships between the cash and futures markets. Second, the liquidity of the futures market depends on participants entering into offsetting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortion. Third, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities market. Therefore, increased participation by speculators in the futures market may cause temporary price distortions.

Combined Positions. The Funds may purchase and write options in combination with each other. For example, a Fund may purchase a put option and write a call option on the same underlying instrument, in order to construct a combined position whose risk and return characteristics are similar to selling a futures contract. Another possible combined position would involve writing a call option at one strike price and buying a call option at a lower price, in order to reduce the risk of the written call option in the event of a substantial price increase. Because combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open and close out.

Under the supervision of the Board of Trustees, the Funds will determine whether investments in options and futures contracts are illiquid. Each Fund is restricted to investing no more than 15% of its total assets in securities that are illiquid; that is, not readily marketable.

Investment in Privately Negotiated Options

The Funds may also invest in privately negotiated option contracts (each a "Private Option"). Generally, an option buyer negotiates with a bank or investment bank to buy a Private Option with contract terms that are more flexible than standardized exchange traded options. Under a Private Option contract, the buyer generally controls the length of the contract, the notional amount, and the asset or basket of securities comprising the reference portfolio that determines the value of the Private Option.

Private Options will generally have a term ranging from 12 to 60 months. The Funds may buy Private Options that will be based on an asset or a basket of securities (the "Basket") selected by the Adviser in accord with a Fund's investment objective and approved by the counter-party. The Basket may be comprised of securities that include common and preferred stock, government and private issuer debt (including convertible and non-convertible debt), options and futures contracts, limited partnership interests (including so-called "hedge funds") and shares of registered investment companies. During the term of a Private Option, the Adviser expects to have a limited right to modify the notional amount of the Private Option and the assets that comprise the Basket.

As with more traditional options, a Private Option will allow for the use of economic leverage without incurring risk beyond the amount of premium and related fees paid for the Private Option. The Private Option will be structured so that it allows a Fund to benefit from an increase in the value of the Basket without owning the assets that comprise the Basket. Upon a decline in the value of the Basket, a Fund may lose all or a portion of the premium paid for the Private Option. A Fund's gain or loss may be magnified by writing the Private Option with reference to a much larger notional amount of the Basket than the premium being paid by a Fund. At no time will a Fund or its shareholders be exposed to a risk of loss in excess of the premium.

Upon the termination or expiration of a Private Option, a Fund will be entitled to receive from the counter-party a cash payment (the "Settlement Price"), which is based on the change in value of the Basket serving as a benchmark for that Private Option. In no event will a Fund have the right to acquire the assets that comprise the Basket. The Settlement Price may reflect deductions for fees and an interest-equivalent amount payable to the counter-party for establishing the Private Option. The Settlement Price will typically be payable to the Fund within a specified number of business days after termination or expiration of the Private Option. Any Private Option that does not require payment of the Settlement Price within seven calendar days after termination or expiration or that cannot be terminated by a Fund at any time will be treated as an illiquid asset.

The counter-party will generally have the right to terminate a Private Option at any time prior to maturity. If the Basket does not sufficiently increase in value prior to termination or expiration, the Fund may still suffer losses even though the Basket increased in value because of fees and interest-equivalent amounts payable to the counter-party or because the increase in value of the Basket has been insufficient to trigger a position settlement value.

The counter-party to each Private Option will be a bank, financial institution, or an entity that is affiliated with either a bank or a financial institution with significant experience in the field of alternative investments. Each counter-party will be one determined by the Adviser to be creditworthy. Neither the Adviser nor the Funds will have any control over any hedging or similar techniques used by the counter-party to attempt to ensure the counter-party's ability to perform under each Private Option. Likewise, neither the Adviser nor a Fund will have any claim on securities or other property, if any, which may be purchased by the counter-party in connection with the Private Option. Should the counter-party be unable to perform its obligations under a Private Option, then the Fund could lose all or a portion of the premium and the gain, if any, relating to such Private Option.

The following examples are intended to illustrate the basic structure and the gain or loss that a Fund might realize on Private Options. Certain details of a typical Private Option have been simplified for purposes of these examples.

Example A - Hypothetical Gain

The Adviser decides to acquire an interest in the increase (or decrease) in the value of securities that reflect the Fund's investment objective (the "Securities"). On behalf of the Fund, the Adviser purchases a Private Option from a counter-party using a Basket established under the Private Option that is comprised of the Securities. For example, the Fund may choose a notional amount of \$150,000 and pay to the counter-party a \$50,000 up-front premium for the Private Option with the Fund entitled to any increase in value of the Basket in excess of \$150,000. The counter-party may or may not decide to purchase the notional value, \$150,000, of the Securities that comprise the Basket in order to hedge its obligations under

the Private Option. The Private Option is terminated after one year, at which time the value of the Index has increased to \$180,000 and the Fund has paid \$5,000 in fees and interest-equivalent payments. The Settlement Price would be calculated as \$180,000 (the current notional amount), less \$100,000 in economic leverage, and the Fund would have a net gain of \$25,000 (\$180,000 less \$100,000 less \$50,000 less \$5,000).

Example B - Hypothetical Loss

The Adviser purchases a Private Option under the terms described above. However, upon termination of the Private Option the value of the Basket has declined to \$120,000. The Settlement Price would be calculated as \$120,000, less \$100,000 in economic leverage, and the Fund would have a net loss of \$35,000 (\$120,000 less \$100,000 less \$50,000 less \$5,000).

Under certain circumstances, Private Options may be deemed illiquid. Under the supervision of the Board of Trustees, the Fund will determine whether investments in Private Options are illiquid. The Fund is restricted to investing no more than 15% of its total assets in securities that are illiquid; that is, not readily marketable.

Mortgage-Backed Securities and Asset-Backed Securities

The Funds may invest in mortgage-backed securities and asset-backed securities. Mortgage-backed securities represent direct or indirect participations in, or are secured by and payable from, mortgage loans secured by real property, and include single- and multi-class pass-through securities and collateralized mortgage obligations (“CMOs”). Such securities may be issued or guaranteed by U.S. Government agencies or instrumentalities, such as the GNMA, FNMA, FHLMC or by private issuers, generally originators and investors in mortgage loans, including savings associations, mortgage bankers, commercial banks, investment bankers and special purpose entities (collectively, “private lenders”).

Mortgage-backed securities issued by private lenders may be supported by pools of mortgage loans or other mortgage-backed securities that are guaranteed, directly or indirectly, by the U.S. Government or one of its agencies or instrumentalities, or they may be issued without any governmental guarantee of the underlying mortgage assets but with some form of non-governmental credit enhancement. Until recently, FNMA and FHLMC were government-sponsored corporations owned entirely by private stockholders. In September 2008, at the direction of the U.S. Department of the Treasury, FNMA and FHLMC were placed into conservatorship under the FHFA. The U.S. government also took steps to provide additional financial support to FNMA and FHLMC. No assurance can be given that the U.S. Treasury initiatives with respect to FNMA and FHLMC will be successful.

The Funds may also invest in residential mortgage-backed securities. Residential mortgage loans are generally classified into three categories based on the risk profile of the borrower and the property: (i) Prime, (ii) Alternative-A (“Alt-A”), and (iii) Subprime. Prime residential mortgage loans are extended to borrowers who represent a relatively low risk profile through a strong credit history. Subprime loans are made to borrowers who display poor credit histories and other characteristics that correlate with a higher default risk. Alt-A loans are made to borrowers whose risk profile falls between Prime and Subprime.

Asset-backed debt obligations represent direct or indirect participation in, or are secured by and payable from, assets such as motor vehicle installment sales contracts, other installment loan contracts, home equity loans, leases of various types of property and receivables from credit card or other revolving credit arrangements. The credit quality of most asset-backed securities depends primarily on the credit quality of the assets underlying such securities, how well the entity issuing the security is insulated from the credit risk and bankruptcy of the originator or any other affiliated entities and the amount and quality of

any credit enhancement of the securities. Payments or distributions of principal and interest on asset-backed debt obligations may be supported by non-governmental credit enhancements including letters of credit, reserve funds, over-collateralization and guarantees by third parties.

The rate of principal payment on mortgage- and asset-backed securities generally depends on the rate of principal payments received on the underlying assets, which in turn may be affected by a variety of economic and other factors. As a result, the yield on any mortgage- or asset-backed security is difficult to predict with precision and actual yield to maturity may be more or less than the anticipated yield to maturity. The yield characteristics of mortgage- and asset-backed debt obligations differ from those of traditional debt obligations. Among the principal differences are that interest and principal payments are made more frequently on mortgage- and asset-backed debt obligations, usually monthly, and that principal may be prepaid at any time because the underlying assets generally may be prepaid at any time. As a result, if these debt obligations or securities are purchased at a premium, a prepayment rate that is faster than expected will reduce yield to maturity, while a prepayment rate that is slower than expected will have the opposite effect of increasing the yield to maturity. Conversely, if these debt obligations or securities are purchased at a discount, a prepayment rate that is faster than expected will increase yield to maturity, while a prepayment rate that is slower than expected will reduce yield to maturity. Mortgage-backed securities available for reinvestment by the Fund are likely to be greater during a period of declining interest rates and, as a result, are likely to be reinvested at lower interest rates than during a period of rising interest rates. Accelerated prepayments on debt obligations or securities purchased at a premium also impose a risk of loss of principal because the premium may not have been fully amortized at the time the principal is prepaid in full. The market for privately issued mortgage-backed securities is smaller and less liquid than the market for government-sponsored mortgage-backed securities.

While asset-backed securities may be issued with only one class of security, many asset-backed securities are issued in more than one class, each with different payment terms. Mortgage-backed securities may be issued with either a single class of security or multiple classes, which are commonly referred to as a CMO. Multiple class mortgage- and asset-backed securities are issued for two main reasons. First, multiple classes may be used as a method of providing selective credit support. This is accomplished typically through creation of one or more classes whose right to payments on the asset-backed security is made subordinate to the right to such payments of the remaining class or classes. Second, multiple classes may permit the issuance of securities with payment terms, interest rates or other characteristics differing both from those of each other and from those of the underlying assets. Examples include STRIPS (mortgage- and asset-backed securities entitling the holder to disproportionate interests with respect to the allocation of interest and principal of the assets backing the security), and securities with class or classes having characteristics that mimic the characteristics of non-asset-backed securities, such as floating interest rates (*i.e.*, interest rates that adjust as a specified benchmark changes) or scheduled amortization of principal.

The Funds may invest in stripped mortgage-backed securities, which receive differing proportions of the interest and principal payments from the underlying assets, including interest-only (“IO”) and principal-only (“PO”) securities. IO and PO mortgage-backed securities may be illiquid. The market value of such securities generally is more sensitive to changes in prepayment and interest rates than is the case with traditional mortgage-backed securities, and in some cases such market value may be extremely volatile.

Mortgage- and asset-backed securities, other than as described above, or in which the payment streams on the underlying assets are allocated in a manner different than those described above may be issued in the future. The Funds may invest in such mortgage- and asset-backed securities if such investment is otherwise consistent with its investment objective and policies and with the investment restrictions of the Fund.

If the Funds purchase mortgage- or asset-backed securities that are “subordinated” to other interests in the same mortgage pool, the Fund as a holder of those securities may only receive payments after the pool’s obligations to other investors have been satisfied. An unexpectedly high rate of defaults on the mortgages held by a mortgage pool may substantially limit the pool’s ability to make payments of principal or interest to a Fund as a holder of such subordinated securities, reducing the values of those securities or in some cases rendering them worthless. The risk of such defaults is generally higher in the case of mortgage pools that include so called “subprime” mortgages. An unexpectedly high or low rate of prepayments on a pool’s underlying mortgages may have a similar effect on subordinated securities. A mortgage pool may issue securities subject to various levels of subordination, and the risk of non-payment affects securities at each level, although the risk is greater in the case of more highly subordinated securities.

Structured Notes, Bonds and Debentures

A Fund may invest in structured notes, bonds and debentures. Typically, the value of the principal and/or interest on these instruments is determined by reference to changes in the value of specific currencies, interest rates, commodities, indexes or other financial indicators (the “Reference”) or the relevant change in two or more References. The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. The terms of the structured securities may provide that in certain circumstances no principal is due at maturity and, therefore, may result in the loss of a Fund’s entire investment. The value of structured securities may move in the same or the opposite direction as the value of the Reference, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, the change in interest rate or the value of the security at maturity may be a multiple of the change in the value of the Reference so that the security may be more or less volatile than the Reference, depending on the multiple. Consequently, structured securities may entail a greater degree of market risk and volatility than other types of debt obligations.

Unit Investment Trusts

A unit investment trust, commonly referred to as a UIT, is one of three basic types of investment companies. The other two types are mutual funds and closed-end funds. A unit investment trust is a registered investment company that buys and holds a generally fixed portfolio of stocks, bonds, or other securities. “Units” in the trust are sold to investors (unitholders) who receive a share of principal and dividends (or interest). A UIT has a stated date for termination that varies according to the investments held in its portfolio. A UIT investing in long-term bonds may remain outstanding for 20 to 30 years. UITs that invest in stocks may seek to capture capital appreciation over a period of a year or a few years. When these trusts are dissolved, proceeds from the securities are either paid to unitholders or reinvested in another trust. A UIT does not actively trade its investment portfolio. That is, a UIT buys a relatively fixed portfolio of securities (for example, five, ten, or twenty specific stocks or bonds), and holds them with little or no change for the life of the UIT. Because the investment portfolio of a UIT generally is fixed, investors know more or less what they are investing in for the duration of their investment. Investors will find the portfolio securities held by the UIT listed in its prospectus.

Cash or Similar Investments; Temporary Strategies

Under normal market conditions, each Fund will stay fully invested according to its principal investment strategies as noted above. A Fund, however, may temporarily depart from its principal investment strategies by making short-term investments in cash, cash equivalents, and high-quality, short-term debt securities and money market instruments for temporary defensive purposes in response to adverse market, economic or political conditions. This may result in a Fund not achieving its investment objective during that period.

For longer periods of time, a Fund may hold a substantial cash position. If the market advances during periods when a Fund is holding a large cash position, the Fund may not participate to the extent it would have if the Fund had been more fully invested. To the extent that a Fund uses a money market fund for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market fund's advisory fees and operational expenses.

Each Fund may invest in any of the following securities and instruments:

Money Market Mutual Funds. A Fund may invest in money market mutual funds in connection with its management of daily cash positions or as a temporary defensive measure. Generally, money market funds seek to earn income consistent with the preservation of capital and maintenance of liquidity. They primarily invest in high quality money market obligations, including securities issued or guaranteed by the U.S. Government or its agencies and instrumentalities, bank obligations and high-grade corporate instruments. These investments generally mature within 397 days from the date of purchase. An investment in a money market fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any government agency. A Fund's investments in money market mutual funds may be used for cash management purposes and to maintain liquidity in order to satisfy redemption requests or pay unanticipated expenses.

If a Fund invests in money market mutual funds pursuant to Section 12(d)(1)(F), it must comply with the following voting restrictions: when the Fund exercises voting rights, by proxy or otherwise, with respect to money market mutual funds owned by the Fund, the Fund will either seek instruction from the Fund's shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

Your cost of investing in a Fund will generally be higher than the cost of investing directly in the underlying money market mutual fund shares. You will indirectly bear fees and expenses charged by the underlying money market mutual funds in addition to the Fund's direct fees and expenses. Furthermore, the use of this strategy could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes payable by you.

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits. A Fund may acquire certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by a Fund will be dollar-denominated obligations of domestic or foreign banks or financial institutions which at the time of purchase have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. Government.

Domestic banks and foreign banks are subject to different governmental regulations with respect to the amount and types of loans that may be made and interest rates that may be charged. In addition, the profitability of the banking industry depends largely upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operations of the banking industry.

As a result of federal and state laws and regulations, domestic banks are, among other things, required to maintain specified levels of reserves, limited in the amount which they can loan to a single borrower, and subject to other regulations designed to promote financial soundness. However, such laws and regulations do not necessarily apply to foreign bank obligations that the Fund may acquire.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under its investment objectives and policies stated above and in the Prospectus, a Fund may make interest-bearing time or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. A Fund may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. Government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. A Fund may invest a portion of its assets in commercial paper and short-term notes. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short-term notes will consist of issues rated at the time of purchase "A-2" or higher by S&P, "Prime-1" or "Prime-2" by Moody's, or similarly rated by another nationally recognized statistical rating organization or, if unrated, will be determined by the investment adviser to be of comparable quality. These rating symbols are described in Appendix A.

Corporate obligations include bonds and notes issued by corporations to finance longer-term credit needs than supported by commercial paper. While such obligations generally have maturities of ten years or more, the Fund may purchase corporate obligations which have remaining maturities of one year or less from the date of purchase and which are rated "A" or higher by S&P or "A" or higher by Moody's.

U.S. Government Obligations

Each Fund may make short-term investments in U.S. Government obligations. Such obligations include Treasury bills, certificates of indebtedness, notes and bonds, and issuers of such entities as the Government National Mortgage Association ("GNMA"). Of these obligations, only those of the GNMA and Treasury bills, are supported by the full faith and credit of the U.S. Treasury.

U.S. Agency Obligations

Each Fund may make short-term investments in U.S. agency obligations, such as the Export-Import Bank of the United States, Tennessee Valley Authority, Resolution Funding Corporation, Farmers Home Administration, Federal Home Loan Banks, Federal Intermediate Credit Banks, Federal Farm Credit Banks, Federal Land Banks, Federal Housing Administration, Federal National Mortgage Association ("FNMA"), Federal Home Loan Mortgage Corporation ("FHLMC"), and the Student Loan Marketing Association. Some, such as those of the Export-Import Bank of United States, are supported only by the right of the issuer to borrow from the Treasury. Others, such as those of the FNMA, are supported by only the discretionary authority of the U.S. Government to purchase the agency's obligations. Still others, such as those of the Student Loan Marketing Association, are supported only by the credit of the instrumentality. No assurance can be given that the U.S. Government would provide financial support to U.S. Government-sponsored instrumentalities because they are not obligated by law to do so. As a result,

there is a risk that these entities will default on a financial obligation. For instance, the financial obligations of FNMA and FHLMC have been placed into conservatorship until the entities are restored to a solvent financial condition.

Assignments and Participations

A Fund may invest in assignments of and participations in loans issued by banks and other financial institutions.

When a Fund purchases assignments from lending financial institutions, a Fund will acquire direct rights against the borrower on the loan. However, since assignments are generally arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by a Fund as the purchaser of an assignment may differ from, and be more limited than, those held by the assigning lender.

Participations in loans will typically result in a Fund having a contractual relationship with the lending financial institution, not the borrower. A Fund would have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender of the payments from the borrower. In connection with purchasing a participation, a Fund generally will have no right to enforce compliance by the borrower with the terms of the loan agreement relating to the loan, nor any rights of set-off against the borrower, and a Fund may not benefit directly from any collateral supporting the loan in which it has purchased a participation. As a result, a Fund purchasing a participation will assume the credit risk of both the borrower and the lender selling the participation. In the event of the insolvency of the lender selling the participation, a Fund may be treated as a general creditor of the lender and may not benefit from any set-off between the lender and the borrower.

A Fund may have difficulty disposing of assignments and participations because there is no liquid market for such securities. The lack of a liquid secondary market will have an adverse impact on the value of such securities and on a Fund's ability to dispose of particular assignments or participations when necessary to meet a Fund's liquidity needs or in response to a specific economic event, such as a deterioration in the creditworthiness of the borrower. The lack of a liquid market for assignments and participations also may make it more difficult for a Fund to assign a value to these securities for purposes of valuing a Fund's portfolio and calculating its net asset value.

A Fund may invest in fixed and floating rate loans ("Loans") arranged through private negotiations between a foreign government (a "Borrower") and one or more financial institutions ("Lenders"). The majority of a Fund's investments in Loans are expected to be in the form of participations in Loans ("Participations") and assignments of portions of Loans from third parties ("Assignments"). Participations typically will result in a Fund having a contractual relationship only with the Lender, not with the Borrower. A Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender selling the Participation and only upon receipt by the Lender of the payments from the Borrower. In connection with purchasing Participations, a Fund generally will have no right to enforce compliance by the Borrower with the terms of the loan agreement relating to the Loan, nor any rights of set-off against the Borrower, and a Fund may not directly benefit from any collateral supporting the Loan in which it has purchased the Participation. As a result, a Fund will assume the credit risk of both the Borrower and the Lender that is selling the Participation. In the event of the insolvency of the Lender selling a Participation, a Fund may be treated as a general creditor of the Lender and may not benefit from any set-off between the Lender and the Borrower.

When a Fund purchases Assignments from Lenders, a Fund will acquire direct rights against the Borrower on the Loan. However, since Assignments are generally arranged through private negotiations between potential assignees and potential assignors, the rights and obligations acquired by a Fund as the purchaser of an Assignment may differ from, and be more limited than, those held by the assigning Lender.

There are risks involved in investing in Participations and Assignments. A Fund may have difficulty disposing of them because there is no liquid market for such securities. The lack of a liquid secondary market will have an adverse impact on the value of such securities and on a Fund's ability to dispose of particular Participations or Assignments when necessary to meet a Fund's liquidity needs or in response to a specific economic event, such as a deterioration in the creditworthiness of the Borrower. The lack of a liquid market for Participations and Assignments also may make it more difficult for a Fund to assign a value to these securities for purposes of valuing a Fund's portfolio and calculating its net asset value.

Repurchase Agreements

A Fund may invest in repurchase agreements. A repurchase agreement is a short term investment in which the purchaser acquires ownership of a U.S. government security and the seller agrees to repurchase the security at a future time at a set price, thereby determining the yield during the purchaser's holding period. Any repurchase transaction in which a Fund engages will require full collateralization of the seller's obligation during the entire term of the repurchase agreement. In the event of a bankruptcy or other default of the seller, a Fund could experience both delays in liquidating the underlying security and losses in value.

Reverse Repurchase Agreements

A Fund may also be involved with reverse repurchase agreements. Reverse repurchase agreements are repurchase agreements in which a Fund is the seller (rather than the buyer) of the securities, and agrees to repurchase them at an agreed upon time and price. A reverse repurchase agreement may be viewed as a type of borrowing by a Fund. Reverse repurchase agreements are subject to credit risks. In addition, reverse repurchase agreements create leverage risks because a Fund must repurchase the underlying security at a higher price, regardless of the market value of the security at the time of repurchase.

Illiquid Securities

Historically, illiquid securities have included securities subject to contractual or legal restrictions on resale because they have not been registered under the Securities Act, securities which are otherwise not readily marketable, and securities such as repurchase agreements having a maturity of longer than seven days. Securities which have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. In recent years, however, a large institutional market has developed for certain securities that are not registered under the Securities Act including repurchase agreements, commercial paper, foreign securities, municipal securities and corporate bonds and notes. Institutional investors depend on an efficient institutional market in which the unregistered security can be readily resold or on an issuer's ability to honor a demand for repayment. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. The Board of Trustees may determine that such securities are not illiquid securities notwithstanding their legal or contractual restrictions on resale. In all other cases, however, securities subject to restrictions on resale will be deemed illiquid. The Fund will determine a security to be illiquid if it cannot be sold or disposed of in the ordinary course of business within seven days at the value at which a Fund has valued the security. Factors considered in determining whether a security is illiquid may include, but are not limited to: the frequency of trades and quotes for the security; the number of dealers willing to purchase

and sell the security and the number of potential purchasers; the number of dealers who undertake to make a market in the security; the nature of the security, including whether it is registered or unregistered, and the market place; whether the security has been rated by a NRSRO; the period of time remaining until the maturity of a debt instrument or until the principal amount of a demand instrument can be recovered through demand; the nature of any restrictions on resale; and with respect to municipal lease obligations and certificates of participation, there is reasonable assurance that the obligation will remain liquid throughout the time the obligation is held and, if unrated, an analysis similar to that which would be performed by an NRSRO is performed. Each Fund will not invest more than 15% of the value of its net assets, taken at the time of investment, in illiquid securities, including repurchase agreements providing for settlement in more than seven days after notice, non-negotiable fixed time deposits with maturities over seven days, over-the-counter options and certain restricted securities not determined by the Board of Trustees to be liquid.

Private Securities Transactions

In general, securities purchased in private transactions are legally restricted as to resale. A Fund's investments in private placements will be subject to a number of risks because the securities will be illiquid securities for which there is no public market. Illiquid securities are subject to risks of potential delays in resale and uncertainty in valuation. In addition, as noted under "Illiquid Securities" above, if at any time more than 15% of a Fund's net assets are invested in illiquid securities, a Fund may take appropriate steps to protect a Fund's liquidity as deemed necessary or advisable by a Fund. In such a case, a Fund may seek to sell private securities in its portfolio prematurely at prices below what the Adviser believes to be the securities' fair value.

Restricted Securities

Within its limitation on investment in illiquid securities and a Fund's private investments, a Fund may purchase restricted securities that generally can be sold in privately negotiated transactions, pursuant to an exemption from registration under the federal securities laws, or in a registered public offering. Where registration is required, a Fund may be obligated to pay all or part of the registration expense and a considerable period may elapse between the time it decides to seek registration and the time a Fund may be permitted to sell a security under an effective registration statement. If during such a period adverse market conditions were to develop, a Fund might obtain a less favorable price than prevailed when it decided to seek registration of the security. A Fund values restricted securities under fair value procedures described above under "Illiquid Securities" and as described in the section entitled "Investing in a Fund – Determining a Fund's Net Asset Value" of the Prospectus.

Forward Commitment & When-Issued Securities

A Fund may purchase securities on a when-issued basis or for settlement at a future date if a Fund holds sufficient assets to meet the purchase price. In such purchase transactions, a Fund will not accrue interest on the purchased security until the actual settlement. Similarly, if a security is sold for a forward date, a Fund will accrue the interest until the settlement of the sale. When-issued security purchases and forward commitments have a higher degree of risk of price movement before settlement due to the extended time period between the execution and settlement of the purchase or sale. As a result, the exposure to the counterparty of the purchase or sale is increased. Although a Fund would generally purchase securities on a forward commitment or when-issued basis with the intention of taking delivery, a Fund may sell such a security prior to the settlement date if the Adviser felt such action was appropriate. In such a case, a Fund could incur a short-term gain or loss.

Lending of Portfolio Securities

In order to generate additional income, a Fund may lend portfolio securities in an amount up to 33% of total Fund assets to broker-dealers, major banks, or other recognized domestic institutional borrowers of securities that the Adviser has determined are creditworthy under guidelines established by the Trustees. In determining whether a Fund will lend securities, the Adviser will consider all relevant facts and circumstances. A Fund may not lend securities to any company affiliated with the Adviser. Each loan of securities will be collateralized by cash, securities or letters of credit. A Fund might experience a loss if the borrower defaults on the loan.

The borrower at all times during the loan must maintain with a Fund cash or cash equivalent collateral, or provide to a Fund an irrevocable letter of credit equal in value to at least 100% of the value of the securities loaned. While the loan is outstanding, the borrower will pay a Fund any interest paid on the loaned securities, and a Fund may invest the cash collateral to earn additional income. Alternatively, a Fund may receive an agreed-upon amount of interest income from the borrower who has delivered equivalent collateral or a letter of credit. It is anticipated that a Fund may share with the borrower some of the income received on the collateral for the loan or a Fund will be paid a premium for the loan. Loans are subject to termination at the option of a Fund or the borrower at any time. A Fund may pay reasonable administrative and custodial fees in connection with a loan, and may pay a negotiated portion of the income earned on the cash to the borrower or placing broker. As with other extensions of credit, there are risks of delay in recovery or even loss of rights in the collateral should the borrower fail financially.

Investment Restrictions

Fundamental Investment Restrictions

The Trust (on behalf of the Funds) has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a “majority of the outstanding voting securities” of a Fund, as defined in the 1940 Act. Under the 1940 Act, the vote of the holders of a “majority of the outstanding voting securities” means the vote of the holders of the lesser: of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented; or (ii) more than 50% of the outstanding shares of the Fund.

Each Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its total assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales in accordance with its objective and strategies;
2. Act as underwriter (except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio);
3. Invest 25% or more of its net assets, calculated at the time of purchase and taken at market value, in securities of issuers in any one industry (other than U.S. Government securities)⁽¹⁾;
4. Purchase or sell real estate unless acquired as a result of ownership of securities (although the Fund may purchase and sell securities which are secured by real estate and securities of companies that invest or deal in real estate);

5. Purchase or sell commodities, unless acquired as a result of ownership of securities or other instruments and provided that this restriction does not prevent the Fund from engaging in transactions involving currencies and futures contracts and options thereon or investing in securities or other instruments that are secured by commodities;
6. Make loans of money (except for the lending of its portfolio securities, purchases of debt securities consistent with the investment policies of the Fund and except for repurchase agreements);
7. With respect to 75% of its total assets, except for the Focused Value Fund, invest 5% or more of its total assets, computed at the time of investment, in securities of a single issuer or hold more than 10% of the voting securities of such issuer (with the exception that these restrictions do not apply to the Fund's investments in the securities of the U.S. Government, its agencies or instrumentalities or other investment companies); or
8. with respect to 50% of its total assets, invest 5% or more of its total assets, computed at the time of investment, in securities of a single issuer or hold more than 10% of the voting securities of such issuer (does not apply to investment in the securities of the U.S. Government, its agencies or instrumentalities or other investment companies).

⁽¹⁾ For purposes of complying with this restriction, each Fund will look through to the securities of any underlying funds.

Non-Fundamental Restrictions

The following lists the non-fundamental investment restrictions applicable to each Fund. These restrictions can be changed by the Board of Trustees, but the change will only be effective after prior written notice is given to shareholders of a Fund.

Each Fund may not:

1. With respect to Fundamental Investment Restriction 1 above, purchase portfolio securities while outstanding borrowings exceed 5% of its assets; or
2. Invest 15% or more of the value of its net assets, taken at the time of investment, in illiquid securities. Illiquid securities are those securities without readily available market quotations, including repurchase agreements having a maturity of more than seven days. Illiquid securities may include restricted securities not determined by the Board of Trustees to be liquid, non-negotiable time deposits, over-the-counter options, and repurchase agreements providing for settlement in more than seven days after notice.

Management of the Funds

Board of Trustees

The management and affairs of the Funds are supervised by the Board of Trustees. The Board of Trustees consists of four individuals. The Trustees are fiduciaries for the Funds' shareholders and are governed by the laws of the State of Delaware in this regard. The Board of Trustees establishes policies for the operation of the Funds and appoints the officers who conduct the daily business of the Funds.

Trustees and Officers

The Trustees and officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years.

Name, Address and Age	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee During the Past Five Years
<i>Independent Trustees</i>					
Michael D. Akers, Ph.D. 615 E. Michigan St. Milwaukee, WI 53202 Age: 61	Trustee	Indefinite Term; Since August 22, 2001	37	Professor and Chair, Department of Accounting, Marquette University (2004-present).	Independent Trustee, USA MUTUALS (an open-end investment company with one portfolio).
Gary A. Drska 615 E. Michigan St. Milwaukee, WI 53202 Age: 60	Trustee	Indefinite Term; Since August 22, 2001	37	Pilot, Frontier/Midwest Airlines, Inc. (airline company) (1986- present).	Independent Trustee, USA MUTUALS (an open-end investment company with one portfolio).
Jonas B. Siegel 615 E. Michigan St. Milwaukee, WI 53202 Age: 73	Trustee	Indefinite Term; Since October 23, 2009	37	Retired (2011- present); Managing Director, Chief Administrative Officer (“CAO”) and Chief Compliance Officer (“CCO”), Granite Capital International Group, L.P. (an investment management firm) (1994-2011).	Independent Manager, Ramius IDF fund complex (two closed-end investment companies); Independent Trustee, Gottex Trust (an open- end investment company with one portfolio); Independent Trustee, Gottex Multi-Asset Endowment fund complex (three closed-end investment companies) (2010-2015); Independent Trustee, Gottex Multi-Alternatives fund complex (three closed-end investment companies) (2010-2015).

Kelly A. Burns 615 E. Michigan St. Milwaukee, WI 53202 Age: 29	Assistant Treasurer	Indefinite Term; Since April 23, 2015	N/A	Officer, U.S. Bancorp Fund Services, LLC (2011-present).	N/A
Melissa Aguinaga 615 E. Michigan St. Milwaukee, WI 53202 Age: 29	Assistant Treasurer	Indefinite Term; Since July 1, 2015	N/A	Officer, U.S. Bancorp Fund Services, LLC (2010-present).	N/A

* Mr. Neuberger is an “interested person” of the Trust as defined by the 1940 Act by virtue of the fact that he is a board member and an interested person of Quasar Distributors, LLC (the “Distributor”), the Funds’ principal underwriter.

Role of the Board

The Board provides oversight of the management and operations of the Trust. Like all mutual funds, the day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust and its individual series, such as the Adviser, Distributor, administrator, custodian, and transfer agent, each of whom are discussed in greater detail in this SAI. The Board approves all significant agreements between the Trust and its service providers, including the agreements with the Adviser, Distributor, administrator, custodian and transfer agent. The Board has appointed various individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust’s day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust’s operations. The Board has appointed a CCO who reports directly to the Board and who administers the Trust’s compliance program and regularly reports to the Board as to compliance matters, including an annual compliance review. Some of these reports are provided as part of formal “Board Meetings,” which are held five times per year, in person, and such other times as the Board determines is necessary, and involve the Board’s review of recent Trust operations. From time to time one or more members of the Board may also meet with Trust officers in less formal settings, between formal Board Meetings to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust, and its oversight role does not make the Board a guarantor of the Trust’s investments, operations or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to effectively perform its oversight function. The Board of Trustees is comprised of three Independent Trustees – Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel – and one Interested Trustee – Mr. Joseph C. Neuberger. Accordingly, 75% of the members of the Board are Independent Trustees, Trustees who are not affiliated with the Adviser or its affiliates, or any other investment adviser or other service provider to the Trust or any underlying fund. The Board of Trustees has established three standing committees, an Audit Committee, a Nominating Committee and a Valuation Committee, which are discussed in greater detail under “Board Committees” below. Each of the Audit Committee and the Nominating Committee is comprised entirely of Independent Trustees. The Independent Trustees have engaged their own independent counsel to advise them on matters relating to their responsibilities in connection with the Trust.

The Trust’s Chairperson, Mr. Neuberger, is an “interested person” of the Trust, as defined by the 1940 Act, by virtue of the fact that he is a board member and an interested person of the Distributor, which acts as principal underwriter to the Fund and to many of the Trust’s underlying funds. Mr. Neuberger also serves as Executive Vice President of U.S. Bancorp Fund Services, LLC, the Fund’s administrator (the “Administrator” or “USBFS”). The Trust has not appointed a lead Independent Trustee.

In accordance with the fund governance standards prescribed under the 1940 Act, the Independent Trustees on the Nominating Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board of Trustees because of his experience, qualifications, attributes and skills as set forth in the subsection “Trustee Qualifications” below.

The Board reviews its structure regularly in light of the characteristics and circumstances of the Trust, including: the unaffiliated nature of each investment adviser and the fund(s) managed by such adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent distribution arrangements of each of the Trust’s underlying funds.

The Board has determined that the function and composition of the Audit Committee and the Nominating Committee are appropriate means to address any potential conflicts of interest that may arise from the Chairperson’s status as an Interested Trustee. In addition, the inclusion of all Independent Trustees as members of the Audit Committee and the Nominating Committee allows all such Trustees to participate in the full range of the Board’s oversight duties, including oversight of risk management processes discussed below. Given the specific characteristics and circumstances of the Trust as described above, the Trust has determined that the Board’s leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel, including personnel of the Trust’s service providers. Because risk management is a broad concept composed of many elements (such as, for example, investment risk, issuer and counterparty risk, compliance risk, operational risks, business continuity risks, etc.) the oversight of different types of risks is handled in different ways. For example, the Chief Compliance Officer regularly reports to the Board during Board Meetings and meets in executive session with the Independent Trustees and their legal counsel to discuss compliance and operational risks. In addition, the Independent Trustee designated as the Audit Committee’s “audit committee financial expert” meets with the Treasurer and the Trust’s independent public accounting firm to discuss, among other things, the internal control structure of the Trust’s

financial reporting function. The full Board receives reports from the investment advisers to the underlying funds and the portfolio managers as to investment risks as well as other risks that may be discussed during Audit Committee meetings.

Trustee Qualifications

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills appropriate to his continued service as Trustee of the Trust in light of the Trust's business and structure. The Trustees have substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and assess information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the Trustees have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a "self-assessment" wherein the effectiveness of the Board and the individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each individual Trustee. The information provided below, and in the table above, is not all-inclusive. Many of the Trustees' qualifications to serve on the Board involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests. In conducting its annual self-assessment, the Board has determined that the Trustees have the appropriate attributes and experience to continue to serve effectively as Trustees of the Trust.

Michael D. Akers, Ph.D., CPA. Dr. Akers has served as an Independent Trustee of the Trust since 2001. Dr. Akers has also served as an independent trustee of USA Mutuals, an open-end investment company, since 2001. Dr. Akers has been a Professor and Chair of the Department of Accounting at Marquette University since 2004, and was Associate Professor of Accounting of Marquette University from 1996 to 2004. Dr. Akers is a certified public accountant, a certified fraud examiner, a certified internal auditor and a certified management accountant. Through his experience as a trustee of mutual funds and his employment experience, Dr. Akers is experienced with financial, accounting, regulatory and investment matters.

Gary A. Drska. Mr. Drska has served as an Independent Trustee of the Trust since 2001. Mr. Drska has also served as an independent trustee of USA Mutuals since 2001. Mr. Drska has served as a Pilot of Frontier/Midwest Airlines, Inc., an airline company, since 1986. Through his experience as a trustee of mutual funds, Mr. Drska is experienced with financial, accounting, regulatory and investment matters.

Joseph C. Neuberger. Mr. Neuberger has served as an Interested Trustee of the Trust since 2001. Mr. Neuberger has also served as a trustee of USA Mutuals since 2001 and Buffalo Funds, an open-end investment company, since 2003. Mr. Neuberger has served as Executive Vice President of the Administrator, a multi-service line service provider to mutual funds, since 1994. Through his experience as a trustee of mutual funds and his employment experience, Mr. Neuberger is experienced with financial, accounting, regulatory and investment matters.

Jonas B. Siegel, CPA. Mr. Siegel has served as a Trustee of the Trust since 2009. Since 2011, Mr. Siegel has also served as an Independent Manager of the Ramius IDF fund complex, which is composed of two closed-end investment companies. Since 2013, Mr. Siegel has served as an independent trustee of Gottex Trust, an open-end investment company. Mr. Siegel previously served as a trustee of the Gottex Multi-Asset Endowment fund complex from 2010 to 2015, and as a trustee of the Gottex Multi-Alternatives fund complex from 2010 to 2015, each of which is composed of three closed-end investment companies.

He also served as the Managing Director, CAO and CCO of Granite Capital International Group, LP, an investment management firm, from 1994 to 2011, as Vice President, Secretary, Treasurer and CCO of Granum Series Trust, an open-end investment company, from 1997 to 2007, and as President, CAO and CCO of Granum Securities, LLC, a broker-dealer, from 1997 to 2007. Mr. Siegel is a certified public accountant. Through his experience as a trustee of mutual funds and his employment experience, Mr. Siegel is experienced with financial, accounting, regulatory and investment matters.

Trustee Ownership of Fund Shares

As of the date of this SAI, no Trustee of the Trust beneficially owned shares of the Funds or any other series of the Trust.

Furthermore, as of the date of this SAI, neither the Trustees who are not “interested” persons of the Funds, nor members of their immediate families, own securities beneficially, or of record, in the Adviser, the Distributor or any of their affiliates. During the past two years ended December 31, 2015, neither the Trustees who are not “interested” persons of the Funds nor members of their immediate families, have had a direct or indirect interest, the value of which exceeds \$120,000 in: (i) the Adviser, the Distributor or any of their affiliates, or (ii) any transaction or relationship in which any such entity, the Funds, any officer of the Funds, or any of their affiliates was a party.

Board Committees

Audit Committee. The Trust has an Audit Committee, which is composed of the Independent Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel. The Audit Committee reviews financial statements and other audit-related matters for the Fund. The Audit Committee also holds discussions with management and with the Fund’s independent auditor concerning the scope of the audit and the auditor’s independence. Dr. Akers serves as the Audit Committee chairman and serves as the Audit Committee’s “audit committee financial expert,” as stated in the annual reports relating to the series of the Trust.

Nominating Committee. The Trust has a Nominating Committee, which is composed of the Independent Trustees, Dr. Michael D. Akers, Mr. Gary A. Drska and Mr. Jonas B. Siegel. The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary. As part of this process, the Nominating Committee considers criteria for selecting candidates sufficient to identify a diverse group of qualified individuals to serve as trustees.

The Nominating Committee will consider nominees recommended by shareholders for vacancies on the Board of Trustees. Recommendations for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed nominee, and such recommendation must comply with the notice provisions set forth in the Trust’s By-Laws. In general, to comply with such procedures, such nominations, together with all required information, must be delivered to and received by the Secretary of the Trust at the principal executive office of the Trust not later than 60 days prior to the shareholder meeting at which any such nominee would be voted on. Shareholder recommendations for nominations to the Board of Trustees will be accepted on an ongoing basis and such recommendations will be kept on file for consideration when there is a vacancy on the Board of Trustees. The Nominating Committee’s procedures with respect to reviewing shareholder nominations will be disclosed as required by applicable securities laws.

Valuation Committee. The Trust has a Valuation Committee. The Valuation Committee is responsible for the following: (1) monitoring the valuation of Fund securities and other investments; and (2) as required, when the Board of Trustees is not in session, determining the fair value of illiquid securities and other holdings after consideration of all relevant factors, which determinations are reported to the Board. The Valuation Committee is currently composed of Mr. John Buckel, Ms. Jennifer Lima and Mr. Jesse Schmitting, who each serve as an officer of the Trust. The Valuation Committee meets as necessary when a price for a portfolio security is not readily available.

Trustee Compensation

The Independent Trustees receive from the Trust a retainer fee of \$50,000 per year, \$2,500 for each in-person Board meeting attended and \$1,000 for each telephonic Board meeting attended, as well as reimbursement for expenses incurred in connection with attendance at meetings. Members of the Audit Committee receive \$1,500 for each meeting of the Audit Committee attended. The chairman of the Audit Committee receives an annual retainer of \$2,500. Interested Trustees of the Trust do not receive any compensation for their service as Trustee. Because the Funds have recently commenced operations, the following compensation represent estimates for the fiscal year ending February 28, 2017:

Name of Person/Position	Aggregate Compensation from the Funds⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Funds Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Funds and the Trust⁽²⁾ Paid to Trustees
Dr. Michael D. Akers, Independent Trustee ⁽³⁾⁽⁴⁾	\$3,053	None	None	\$75,000
Gary A. Drska, Independent Trustee ⁽³⁾	\$2,921	None	None	\$72,500
Jonas B. Siegel, Independent Trustee ⁽³⁾	\$2,921	None	None	\$70,000
Joseph C. Neuberger, Interested Trustee	None	None	None	None

⁽¹⁾ Trustees' fees and expenses are allocated among the Funds and the other series comprising the Trust.

⁽²⁾ There are currently thirty-five other portfolios comprising the Trust.

⁽³⁾ Audit Committee member.

⁽⁴⁾ Audit Committee chairman.

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for a shareholder vote by the Fund. As of the date of this SAI, the Adviser owns all of the outstanding shares of each of the Funds.

Investment Adviser

As stated in the Prospectus, investment advisory services are provided to the Funds by the Adviser, Snow Capital Management L.P., pursuant to an investment advisory agreement (the "Advisory Agreement"). As of the date of this SAI, Mr. Richard Snow, Snow Capital Management Holdings, LP and Snow Capital Management, Inc. are control persons of the Adviser by virtue of their 52% ownership interest in the voting stock of the Adviser.

After an initial two year period, the Advisory Agreement continues in effect from year to year, only if such continuance is specifically approved at least annually by: (i) the Board of Trustees or the vote of a majority of the outstanding voting securities of a Fund; and (ii) the vote of a majority of the trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust, on behalf of a Fund, upon 60 days' written notice to the Adviser when authorized either by: (i) a majority vote of the outstanding voting securities of a Fund; or (ii) by a vote of a majority of the Board of Trustees, or by the Adviser upon 60 days' written notice to the Trust. The Advisory Agreement will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Adviser under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for a Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

In consideration of the services provided by the Adviser pursuant to the Advisory Agreement, the Adviser is entitled to receive from each Fund an investment advisory fee computed daily and paid monthly, based on a rate of the Fund's average daily net assets as specified in the table below. However, the Adviser may voluntarily agree to waive a portion of the fees payable to it by a Fund on a month-to-month basis, including additional fees above and beyond any contractual agreement the Adviser may have to waive fees and/or reimburse Fund expenses.

Fund	Management Fee (as a percentage of average daily net assets)
Focused Value Fund	0.70%
Dividend Plus Fund	0.70%

The tables below set forth, for the fiscal periods ended February 29, 2016 and February 28, 2015 and February 28, 2014, the advisory fees accrued by the Predecessor Funds under their prior investment advisory agreement with the Adviser, the amount of the advisory fees and Fund operating expenses waived or reimbursed by the Adviser, and the total advisory fees paid by the Predecessor Funds to the Adviser under their prior investment advisory agreement:

Focused Value Fund

Fiscal Year Ended	Advisory Fee	Waiver	Advisory Fee after Waiver
February 29, 2016	\$3,007	(\$3,007)	\$0
February 28, 2015	\$3,237	(\$3,237)	\$0
February 28, 2014 ⁽¹⁾	\$2,397	(\$2,397)	\$0

⁽¹⁾ The Predecessor Fund commenced operations on March 28, 2013.

Dividend Plus Fund

Fiscal Year Ended	Advisory Fee	Waiver	Advisory Fee after Waiver
February 29, 2016	\$2,291	(\$2,291)	\$0
February 28, 2015	\$2,445	(\$2,445)	\$0
February 28, 2014 ⁽¹⁾	\$1,912	(\$1,912)	\$0

⁽¹⁾ The Predecessor Fund commenced operations on March 28, 2013.

Fund Expenses. Each Fund is responsible for its own operating expenses. The Adviser has agreed to waive its management fees payable to it by each Fund and/or to reimburse Fund operating expenses to the extent necessary to limit each Fund’s aggregate annual operating expenses (excluding any front-end or contingent deferred loads, taxes, leverage expenses (*i.e.*, any expenses incurred in connection with borrowings made by the Fund), interest, brokerage commissions, acquired fund fees and expenses, dividends or interest expenses or short positions, expenses incurred in connection with any merger or reorganization, or extraordinary expenses) to the limit set forth in the Fees and Expenses Table of the Prospectus. Any such reimbursements made by the Adviser of its management fees or payment of expenses that are a Fund’s obligation are subject to reimbursement by a Fund to the Adviser, if so requested by the Adviser, in subsequent years if the aggregate amount actually paid by a Fund toward the operating expenses for such fiscal year (taking into account the reimbursement) does not exceed the applicable limitation on Fund expenses, if such reimbursements will not cause the Fund to exceed the lesser of: (1) the expense limitation in place at the time of the waiver; or (2) the expense limitation in place at the time of the recoupment. The Adviser is permitted to be reimbursed only for management fee waivers and expense payments made in the previous three fiscal years from the date the expense was incurred. Any such reimbursement is also contingent upon the Board of Trustees’ subsequent review and ratification of the reimbursed amounts. Such reimbursement may not be paid prior to a Fund’s payment of current ordinary operating expenses.

Portfolio Managers

As stated in the Prospectus, Mr. Richard A. Snow, Mr. Joshua R. Schachter, Ms. Anne S. Wickland, Ms. Jessica W. Bemer, Mr. Simon C. Rosenberg, Mr. Joseph F. Artuso and Mr. Joseph D. Famoso are the Portfolio Managers for one or more of the Funds (the “Portfolio Managers”).

The table below identifies, for each Portfolio Manager of each Fund, the number of accounts managed (excluding the Funds) and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles and other accounts. Asset amounts are approximate as of August 31, 2016, and have been rounded.

Category of Account	Total Number of Accounts Managed	Total Assets in Accounts Managed (in millions)	Number of Accounts for which Advisory Fee is Based on Performance	Assets in Accounts for which Advisory Fee is Based on Performance (in millions)
<u>Richard A. Snow</u>				
Other Registered Investment Companies	1	\$206.6	0	\$0
Other Pooled Investment Vehicles	1	\$91.7	1	\$91.7
Other Accounts	2,192	\$3,027.6	0	\$0

Other Registered Investment Companies	1	\$0.3	0	\$0
Other Pooled Investment Vehicles	0	\$0	0	\$0
Other Accounts	54	\$800.6	0	\$0

The Adviser also serves as the investment adviser to various privately managed accounts, some of which may have a similar investment strategy to that of the Funds, which could create certain conflicts of interest with respect to timing and allocation of transactions. All portfolio transactions will be implemented according to the Adviser's trade allocation policies. These policies, among other things, ensure that trades are allocated in a manner that fulfills the Adviser's fiduciary duty to each advisory client, and is fair and nondiscriminatory.

Each of the Portfolio Managers receives compensation in the form of a fixed salary. The Portfolio Managers are also eligible for a bonus, which is based on the overall profitability of the Adviser. Additionally, the Portfolio Managers may receive equity dividends from their ownership in the Adviser. The Portfolio Managers are eligible to participate in the Adviser's retirement plan under the same guidelines and criteria established for all employees of the Adviser.

As of August 31, 2016, none of the Portfolio Managers beneficially owned any shares of the Funds.

Service Providers

Fund Administrator, Transfer Agent and Fund Accountant

Pursuant to an administration agreement between the Trust and the U.S. Bancorp Fund Services, LLC, 615 East Michigan Street, Milwaukee, WI 53202, the Administrator will act as administrator for the Funds. The Administrator provides certain administrative services to the Funds, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Funds' independent contractors and agents; preparing for signature by an officer of the Trust all of the documents required to be filed for compliance by the Trust and the Funds with applicable laws and regulations excluding those of the securities laws of various states; arranging for the computation of performance data, including net asset value and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the Funds; and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, the Administrator does not have any responsibility or authority for the management of the Funds, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. The Administrator also acts as fund accountant, transfer agent and dividend disbursing agent under separate agreements. For its administration and fund accounting services, the Administrator receives from the Funds a combined fee computed daily and payable monthly based on the Fund's average net assets at the rate of 0.001% of average net assets on the first \$75 million, 0.0008% of average net assets on the next \$250 million, and 0.0005% on the balance, all subject to an annual minimum fee of \$64,000 per Fund.

For the fiscal periods indicated below, the Predecessor Funds paid the following fees to M3Sixty, the Predecessor Funds' prior administrator:

Focused Value Fund

Fiscal Period Ended	Administration Fee
February 29, 2016	\$26,737
February 28, 2015	\$25,259
February 28, 2014 ⁽¹⁾	\$22,819

⁽¹⁾ The Predecessor Fund commenced operations on March 28, 2013.

Dividend Plus Fund

Fiscal Period Ended	Administration Fee
February 29, 2016	\$26,694
February 28, 2015	\$25,209
February 28, 2014 ⁽¹⁾	\$22,802

⁽¹⁾ The Predecessor Fund commenced operations on March 28, 2013.

Custodian

U.S. Bank, N.A., an affiliate of U.S. Bancorp Fund Services, LLC, is the custodian of the assets of the Funds pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian charges fees on a transactional basis plus out-of-pocket expenses. The Custodian's address is 1555 North River Center Drive, Suite 302, Milwaukee, WI 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Funds. The Custodian and its affiliates may participate in revenue sharing arrangements with service providers of mutual funds in which the Funds may invest.

Legal Counsel

Godfrey & Kahn, S.C., 833 East Michigan Street, Suite 1800, Milwaukee, Wisconsin 53202, acts as legal counsel to the Funds.

Independent Registered Public Accounting Firm

Deloitte & Touche LLP, 555 East Wells Street, Milwaukee, WI 53202 serves as the independent registered public accounting firm of the Funds.

Distribution and Servicing of Fund Shares

The Trust has entered into a distribution agreement (the "Distribution Agreement") with the Distributor, 615 East Michigan Street, Milwaukee, WI 53202, pursuant to which the Distributor acts as the Funds' principal underwriter, provides certain administration services and promotes and arranges for the sale of the Funds' shares. The offering of the Funds' shares is continuous, and the Distributor distributes the Funds' shares on a best efforts basis. The Distributor, Administrator and Custodian are affiliated companies. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

The Distribution Agreement has an initial term of two years and will continue in effect only if its continuance is specifically approved at least annually by the Board of Trustees or by vote of a majority of a Fund's outstanding voting securities and, in either case, by a majority of the trustees who are not parties to the Distribution Agreement or "interested persons" (as defined in the 1940 Act) of any such party. The

Distribution Agreement is terminable without penalty by the Trust on behalf of a Fund on 60 days' written notice when authorized either by a majority vote of the outstanding voting securities of a Fund or by the vote of a majority of the Trustees who are not "interested persons" (as defined in the 1940 Act). The Distribution Agreement is terminable without penalty by the Distributor upon 60 days' written notice to the Trust. The Distribution Agreement will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

Name of Principal Underwriter	Net Underwriting Commissions and Discounts	Compensation on Redemptions and Repurchases	Brokerage Commissions	Other Compensation
Matrix Capital Group, Inc. ⁽¹⁾	\$0	\$0	\$0	\$0

⁽¹⁾ The principal underwriter of the Predecessor Funds.

Distribution (Rule 12b-1) and Shareholder Servicing Plan

The Trust has adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act (the "Distribution Plan") on behalf of the Funds. Under the Distribution Plan, each Fund pays a fee to the Fund's distributor for distribution and shareholder services (the "Distribution Fee") for Class A shares at an annual rate of 0.25% of the Fund's average daily net asset value. The Rule 12b-1 distribution fee and shareholder servicing fees are discussed in greater detail below. The Distribution Plan provides that Distributor may use all or any portion of such Distribution Fee to finance any activity that is principally intended to result in the sale of Fund shares, subject to the terms of the Distribution Plan, or to provide certain shareholder services. Institutional Class shares are not subject to a Distribution Fee.

The Distribution Fee is payable to Distributor regardless of the distribution-related expenses actually incurred. Because the Distribution Fee is not directly tied to expenses, the amount of Distribution Fees paid by a Fund during any year may be more or less than actual expenses incurred pursuant to the Distribution Plan. For this reason, this type of distribution fee arrangement is characterized by the staff of the SEC as a "compensation" plan.

The Distribution Plan provides that it will continue from year to year upon approval by the majority vote of the Board of Trustees, including a majority of the trustees who are not "interested persons" of the Funds, as defined in the 1940 Act, and who have no direct or indirect financial interest in the operations of the Distribution Plan or in any agreement related to such plan (the "Qualified Trustees"), as required by the 1940 Act, cast in person at a meeting called for that purpose. It is also required that the trustees who are not "interested persons" of the Funds, select and nominate all other trustees who are not "interested persons" of the Funds. The Distribution Plan and any related agreements may not be amended to materially increase the amounts to be spent for distribution expenses without approval of shareholders holding a majority of a Fund's shares outstanding. All material amendments to the Distribution Plan or any related agreements must be approved by a vote of a majority of the Board of Trustees and the Qualified Trustees, cast in person at a meeting called for the purpose of voting on any such amendment.

The Distribution Plan requires that Distributor provide to the Board of Trustees, at least quarterly, a written report on the amounts and purpose of any payment made under the Distribution Plan. The Distributor is also required to furnish the Board of Trustees with such other information as may reasonably be requested in order to enable the Board of Trustees to make an informed determination of whether the Distribution Plan should be continued. With the exception of the Adviser, no "interested person" of the Fund, as defined in the 1940 Act, and no Qualified Trustee of the Fund has or had a direct or indirect financial interest in the Distribution Plan or any related agreement.

As noted above, the Distribution Plan provides for the ability to use Fund assets to pay financial intermediaries (including those that sponsor mutual fund supermarkets), plan administrators and other service providers to finance any activity that is principally intended to result in the sale of Fund shares (distribution services). The payments made by a Fund to these financial intermediaries are based primarily on the dollar amount of assets invested in the Fund through the financial intermediaries. These financial intermediaries may pay a portion of the payments that they receive from a Fund to their investment professionals. In addition to the ongoing asset-based fees paid to these financial intermediaries under the Distribution Plan, a Fund may, from time to time, make payments under the Distribution Plan that help defray the expenses incurred by these intermediaries for conducting training and educational meetings about various aspects of the Fund for their employees. In addition, a Fund may make payments under the Distribution Plan for exhibition space and otherwise help defray the expenses these financial intermediaries incur in hosting client seminars where the Fund is discussed.

To the extent these asset-based fees and other payments made under the Distribution Plan to these financial intermediaries for the distribution services they provide to a Fund's shareholders exceed the Distribution Fees available, these payments are made by the Adviser from its own resources, which may include its profits from the advisory fee it receives from the Fund. In addition, a Fund may participate in various "fund supermarkets" in which a mutual fund supermarket sponsor (usually a broker-dealer) offers many mutual funds to the sponsor's customers without charging the customers a sales charge. In connection with its participation in such platforms, the Adviser may use all or a portion of the Distribution Fee to pay one or more supermarket sponsors a negotiated fee for distributing a Fund's shares. In addition, in its discretion, the Adviser may pay additional fees to such intermediaries from its own assets.

Rule 12b-1 Distribution Fee

The Distributor may use the Rule 12b-1 distribution fee to pay for services covered by the Distribution Plan including, but not limited to, advertising, compensating underwriters, dealers and selling personnel engaged in the distribution of Fund shares, the printing and mailing of prospectuses, statements of additional information and reports to other than current Fund shareholders, the printing and mailing of sales literature pertaining to the Funds, and obtaining whatever information, analyses and reports with respect to marketing and promotional activities that the Funds may, from time to time, deem advisable.

No payments were made under the distribution plan for any of the Predecessor Funds for the fiscal year ended February 29, 2016.

Portfolio Transactions and Brokerage

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Funds and which broker-dealers are eligible to execute the Funds' portfolio transactions. Purchases and sales of securities in the over-the-counter market will generally be executed directly with a "market-maker" unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Funds will be effected through broker-dealers (including banks) that specialize in the types of securities that the Funds will be holding, unless the Adviser believes that better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other brokerage services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Funds, to be useful in varying degrees, but of indeterminable value.

While it is the Adviser's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Funds, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Funds or to the Adviser, even if the specific services are not directly useful to the Funds and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Funds may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Funds.

Investment decisions for the Funds may or may not be made independently from those of other client accounts. In certain instances, investment decisions will be made similar to other accounts managed. In the case where a Fund uses similar strategies, applicable procedures will be taken to ensure trading allocations will be handled fairly and abide by all appropriate rules and regulations. Nevertheless, it is possible that at times identical securities will be acceptable for both a Fund and one or more of such client accounts. In such event, the position of a Fund and such client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as a Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, a Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that a Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Funds are concerned. In other cases, however, it is believed that the ability of a Fund to participate in volume transactions may produce better executions for such Fund. Notwithstanding the above, the Adviser may execute buy and sell orders for accounts and take action in performance of its duties with respect to any of its accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practical, allocate investment opportunities to accounts, including the Funds, over a period of time on a fair and equitable basis and in accordance with applicable law.

The Funds are required to identify any securities of their “regular brokers or dealers” that a Fund has acquired during its most recent fiscal year. During the fiscal year ended February 29, 2016, the Predecessor Funds did not acquire any such securities.

The Funds are also required to identify any brokerage transactions during their most recent fiscal year that were directed to a broker because of research services provided, along with the amount of any such transactions and any related commissions paid by the Funds. During the fiscal year ended February 29, 2016, the Predecessor Funds had no such transactions.

The following table shows the amounts paid by each Predecessor Fund in brokerage commissions for the fiscal periods ended February 29, 2016 and February 28, 2015 and 2014:

Brokerage Commissions Paid During Fiscal Periods Ended:			
Fund	2016	2015	2014⁽¹⁾
Focused Value Fund	\$176	\$210	\$242
Dividend Plus Fund	\$179	\$228	\$244

⁽¹⁾ The Predecessor Funds commenced operations on March 28, 2013.

Portfolio Turnover

Although the Funds generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (i) the lesser of purchases or sales of portfolio securities for the fiscal year by (ii) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in a Fund’s portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to above-average transaction and brokerage commission costs and may generate capital gains, including short-term capital gains taxable to shareholders as ordinary income (for non-corporate shareholders, currently taxable at a maximum federal income tax rate of 39.6%). To the extent that a Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund.

For the fiscal years ended February 29, 2016 and February 28, 2015, the portfolio turnover rates for each Predecessor Fund were as follows:

Portfolio Turnover Rate During Fiscal Years Ended:		
Fund	2016	2015
Focused Value Fund	71.87%	84.34%
Dividend Plus Fund	66.54%	83.58%

Code of Ethics

The Funds, the Adviser and the Distributor have each adopted a Code of Ethics under Rule 17j-1 of the 1940 Act. These Codes of Ethics permit, subject to certain conditions, personnel of the Adviser and Distributor to invest in securities that may be purchased or held by the Funds.

Proxy Voting Procedures

The Board of Trustees has adopted proxy voting policies and procedures (“Proxy Policies”) wherein the Trust has delegated to the Adviser the responsibility for voting proxies relating to portfolio securities held by the Funds as part of its investment advisory services, subject to the supervision and oversight of the Board of Trustees. The Proxy Voting Policies of the Adviser are described below. Notwithstanding this delegation of responsibilities, however, the Fund retains the right to vote proxies relating to its portfolio securities. The fundamental purpose of the Proxy Policies is to ensure that each vote will be in a manner that reflects the best interest of the Funds and their shareholders, taking into account the value of the Funds’ investments.

The Adviser’s Proxy Voting Guidelines

Routine proposals are those which do not change the structure, bylaws or operations of the corporation to the detriment of the shareholders. Given the routine nature of these proposals, proxies will nearly always be voted with management. Non-routine proposals are more likely to affect the structure and operations of the corporation and, therefore, will have a greater impact on the value of a shareholder’s investment. The Adviser will review each non-routine proposal on a case-by-case basis, and voting decisions will be made on the economic interest of the account.

The Adviser will generally vote against any management proposal that clearly has the effect of restricting the ability of shareholders to realize the full potential value of their investment. Proposals submitted by shareholders for vote usually include issues of corporate governance and other non-routine matters. The Adviser will review each issue on a case-by-case basis in order to determine the position that best represents the financial interest of the account.

Conflicts of Interest

The Adviser is sensitive to conflicts of interest that may arise in the proxy decision-making process. If a material conflict is identified, proxies will be voted for that company in the following manner:

- If the Adviser’s voting guidelines indicate a vote “For” or “Against” a specific issue, the Adviser will vote in accordance with such predetermined guidelines.
- If the guidelines do not cover an issue or indicate a “case-by-case” analysis, the Adviser will either seek the consent of clients or the written recommendation of an independent third party.

The actual voting records relating to portfolio securities of the Funds during the 12-month period ended June 30 is available without charge, upon request, by calling toll-free, 877-SNOWFND (877-766-9363) or by accessing the SEC’s website at www.sec.gov.

Anti-Money Laundering Compliance Program

The Trust has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the “USA PATRIOT Act”). To ensure compliance with this law, the Trust’s Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. Ms. Anita M. Zagrodnik has been designated as the Trust’s Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Distributor and the Funds' transfer agent (the "Transfer Agent") have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a complete and thorough review of all new account applications. The Funds will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Funds may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Funds may be required to transfer the account or proceeds of the account to a governmental agency.

Portfolio Holdings Information

The Trust, on behalf of the Funds, has adopted portfolio holdings disclosure policies (the "Disclosure Policies") that govern the timing and circumstances of disclosure of portfolio holdings of the Funds. Information about the Fund's portfolio holdings will not be distributed to any third party except in accordance with these Disclosure Policies. The Board of Trustees considered the circumstances under which the Funds' portfolio holdings may be disclosed under the Disclosure Policies, considering actual and potential material conflicts that could arise in such circumstances between the interests of the Funds' shareholders and the interests of the Adviser, Distributor or any other affiliated person of the Funds. After due consideration, the Board determined that the Funds have a legitimate business purpose for disclosing portfolio holdings to persons described in these Disclosure Policies.

Information about the Funds' portfolio holdings will not be distributed to any third party except as described below:

- the disclosure is required to respond to a regulatory request, court order or other legal proceedings;
- the disclosure is to a mutual fund rating or evaluation services organization (such as Factset, Morningstar and Lipper), or statistical agency or person performing similar functions, or due diligence department of a broker-dealer or wirehouse, who has, if necessary, signed a confidentiality agreement, or is bound by applicable duties of confidentiality imposed by law, with the Funds;
- the disclosure is made to the Funds' service providers who generally need access to such information in the performance of their contractual duties and responsibilities, and who are subject to duties of confidentiality imposed by law and/or contract, such as the Adviser, the Board of Trustees, the Funds' independent registered public accountants, regulatory authorities, counsel to the Funds or the Board of Trustees, proxy voting service providers, financial printers involved in the reporting process, the fund administrator, fund accountant, transfer agent, or custodian of the Funds;
- the disclosure is made by the Adviser's trading desk to broker-dealers in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities; in addition, the Adviser's trading desk may periodically distribute a holdings list (consisting of names only) to broker-dealers so that such brokers can provide the respective adviser with order flow information;
- the disclosure is made to institutional consultants evaluating the Funds on behalf of potential investors;

- the disclosure is (a) in connection with a quarterly, semi-annual or annual report that is available to the public or (b) relates to information that is otherwise available to the public (*e.g.* portfolio information that is available on the Funds' website at least one day prior to the disclosure); or
- the disclosure is made pursuant to prior written approval of the CCO, or other person so authorized, is for a legitimate business purpose and is in the best interests of the Funds' shareholders.

For purposes of the Disclosure Policies, portfolio holdings information does not include descriptive information if that information does not present material risks of dilution, arbitrage, market timing, insider trading or other inappropriate trading for the Funds. Information excluded from the definition of portfolio holdings information generally includes, without limitation: (i) descriptions of allocations among asset classes, regions, countries or industries/sectors; (ii) aggregated data such as average or median ratios, or market capitalization, performance attributions by industry, sector or country; or (iii) aggregated risk statistics. It is the policy of the Trust to prohibit any person or entity from receiving any direct or indirect compensation or consideration of any kind in connection with the disclosure of information about the Fund's portfolio holdings.

The CCO must document any decisions regarding non-public disclosure of portfolio holdings and the rationale therefor. In connection with the oversight responsibilities by the Board of Trustees, any documentation regarding decisions involving the non-public disclosure of portfolio holdings of the Funds to third parties must be provided to the full Board of Trustees or its authorized committee. In addition, on a quarterly basis, the Board will review any disclosures of portfolio holdings outside of the permitted disclosures described above to address any conflicts between the interests of the Funds shareholders and those of the Adviser or any other Fund affiliate.

Currently, on or about the 15th calendar day of the month following a calendar quarter, the Funds provide their quarterly portfolio holdings to rating and ranking organizations, including Lipper, a Thomson Reuters company, Morningstar, Inc., Standard & Poor's Financial Services, LLC, Bloomberg L.P., Thomson Reuters Corporation, Vickers Stock Research Corporation and Capital-Bridge, Inc. In addition, within 30 days of the calendar quarter end, the Funds may post to their website a list of their top ten holdings. Portfolio holdings information posted on the Funds' website may be separately provided to any person, at the same time that it is filed with the SEC or one day after it is first published on the Funds' website. Additional portfolio holdings disclosure may be approved under the Disclosure Policies by the Trust's CCO, Treasurer or President. Disclosure of the Funds' complete holdings is required to be made quarterly within 60 days of the end of each fiscal quarter, in the annual and semi-annual reports to Fund shareholders, and in the quarterly holdings report on Form N-Q. These reports will be made available, free of charge, on the EDGAR database on the SEC's website at www.sec.gov.

Any suspected breach of this policy must be reported immediately to the CCO, or to the chief compliance officer of the Adviser who is to report it to the CCO. The Board of Trustees reserves the right to amend the Disclosure Policies at any time without prior notice in its sole discretion.

Determination of Net Asset Value

The NAV of each Fund's shares will fluctuate and is determined as of the close of trading on the New York Stock Exchange (the "NYSE") (generally 4:00 p.m., Eastern time) each business day. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that it will not be open on the following days: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and

Christmas Day. However, the NYSE may close on days not included in that announcement. If the NYSE closes early, the Fund will calculate the NAV at the closing time on that day. If an emergency exists as permitted by the SEC, the NAV may be calculated at a different time.

The NAV per share is computed by dividing the value of the securities held by a Fund plus any cash or other assets (including interest and dividends accrued but not yet received) minus all liabilities (including accrued expenses) by the total number of shares in the Fund outstanding at such time.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{Net Asset Value Per Share}$$

Generally, a Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Adviser and the Trust's Valuation Committee pursuant to procedures approved by or under the direction of the Board of Trustees.

Each security held by the Funds that is listed on a securities exchange is valued at the last sale price on the exchange on the date as of which assets are valued. All equity securities that are not traded on a listed exchange are priced on the basis of valuations provided by an approved pricing service or at the mean value between the bid and ask quotes where readily available.

If the security is listed on more than one exchange, the Funds will use the price of the exchange that the Funds generally consider to be the principal exchange on which the security is traded. Portfolio securities listed on the NASDAQ Stock Market LLC ("NASDAQ") will be valued at the NASDAQ Official Closing Price, which may not necessarily represent the last sale price. If there has been no sale on such exchange or on NASDAQ on such day, the security is valued at the mean between the most recent bid and asked prices on such day or the security shall be valued at the latest sales price on the "composite market" for the day such security is being valued. The composite market is defined as a consolidation of the trade information provided by national securities and foreign exchanges and over-the-counter markets as published by a pricing service.

Debt securities, including short-term debt instruments having a maturity of 60 days or less, are valued at the mean in accordance with prices supplied by an approved pricing service. Pricing services may use various valuation methodologies such as the mean between the bid and the asked prices, matrix pricing and other analytical pricing models as well as market transactions and dealer quotations. If a price is not available from a pricing service, the most recent quotation obtained from one or more broker-dealers known to follow the issue will be obtained. Quotations will be valued at the mean between the bid and the offer. Any discount or premium is accreted or amortized on a straight-line basis until maturity.

Money market funds, demand notes and repurchase agreements are valued at cost. If cost does not represent current market value the securities will be priced at fair value.

Redeemable securities issued by open-end, registered investment companies are valued at the NAVs of such companies for purchase and/or redemption orders placed on that day. All exchange-traded funds are valued at the last reported sale price on the exchange on which the security is principally traded.

All other assets of the Funds are valued in such manner as the Board of Trustees in good faith deems appropriate to reflect their fair value.

Additional Purchase and Redemption Information

The information provided below supplements the information contained in the Prospectus regarding the purchase and redemption of Fund shares.

How to Purchase Shares

You may purchase shares of the Funds directly from the Funds, or from securities brokers, dealers or other financial intermediaries (collectively, “Financial Intermediaries”). Investors should contact their Financial Intermediary directly for appropriate instructions, as well as information pertaining to accounts and any service or transaction fees that may be charged. The Funds may enter into arrangements with certain Financial Intermediaries whereby such Financial Intermediaries (and their authorized designees) are authorized to accept your order on behalf of the Funds (each an “Authorized Intermediary”). If you transmit your purchase request to an Authorized Intermediary before the close of regular trading (generally 4:00 p.m., Eastern time) on a day that the NYSE is open for business, shares will be purchased at the next calculated NAV, plus any applicable sales charge after the Financial Intermediary receives the request. Investors should check with their Financial Intermediary to determine if it is an Authorized Intermediary.

Shares are purchased at the next calculated NAV, plus any applicable sales charge, after the Transfer Agent or Authorized Intermediary receives your purchase request in good order. In most cases, in order to receive that day’s NAV, the Transfer Agent must receive your order in good order before the close of regular trading on the NYSE (generally 4:00 p.m., Eastern time).

The Trust reserves the right in its sole discretion: (i) to suspend the continued offering of the Funds’ shares; (ii) to reject purchase orders in whole or in part when in the judgment of the Adviser or the Distributor such rejection is in the best interest of the Funds; and (iii) to reduce or waive the minimum for initial and subsequent investments for certain fiduciary accounts or under circumstances where certain economies can be achieved in sales of the Funds’ shares.

How to Redeem Shares and Delivery of Redemption Proceeds

You may redeem your Fund shares any day the NYSE is open for regular trading, either directly with the Funds or through your Financial Intermediary.

Payments to shareholders for shares of the Funds redeemed directly from the Funds will be made as promptly as possible, but no later than seven days after receipt by the Transfer Agent of the written request in proper form, with the appropriate documentation as stated in the Prospectus, except that the Funds may suspend the right of redemption or postpone the date of payment during any period when (a) trading on the NYSE is restricted as determined by the SEC or the NYSE is closed for other than weekends and holidays; (b) an emergency exists as determined by the SEC making disposal of portfolio securities or valuation of net assets of the Funds not reasonably practicable; or (c) for such other period as the SEC may permit for the protection of the Fund’s shareholders. Under unusual circumstances, the Funds may suspend redemptions, or postpone payment for more than seven days, but only as authorized by SEC rules.

The value of shares on redemption or repurchase may be more or less than the investor’s cost, depending upon the market value of a Fund’s portfolio securities at the time of redemption or repurchase.

Telephone Redemptions

Shareholders with telephone transaction privileges established on their account may redeem Fund shares by telephone. Upon receipt of any instructions or inquiries by telephone from the shareholder, the Funds or their authorized agents may carry out the instructions and/or respond to the inquiry consistent with the shareholder's previously established account service options. For joint accounts, instructions or inquiries from either party will be carried out without prior notice to the other account owners. In acting upon telephone instructions, the Funds and their agents use procedures that are reasonably designed to ensure that such instructions are genuine. These include recording all telephone calls, requiring pertinent information about the account and sending written confirmation of each transaction to the registered owner.

The Transfer Agent will employ reasonable procedures to confirm that instructions communicated by telephone are genuine. If the Transfer Agent fails to employ reasonable procedures, the Funds and the Transfer Agent may be liable for any losses due to unauthorized or fraudulent instructions. If these procedures are followed, however, to the extent permitted by applicable law, neither the Funds nor their agents will be liable for any loss, liability, cost or expense arising out of any redemption request, including any fraudulent or unauthorized request. For additional information, contact the Transfer Agent.

Redemption in Kind

The Funds do not intend to redeem shares in any form except cash. The Trust, however, has filed a notice of election under Rule 18f-1 of the 1940 Act that allows the Funds to redeem in kind redemption requests of a certain amount. Specifically, if the amount you are redeeming during any 90-day period is in excess of the lesser of \$250,000 or 1% of the net assets of a Fund, valued at the beginning of such period, the Fund has the right to redeem your shares by giving you the amount that exceeds \$250,000 or 1% of the net assets of the Fund in securities instead of cash. If a Fund pays your redemption proceeds by a distribution of securities, you could incur brokerage or other charges in converting the securities to cash, and will bear any market risks associated with such securities until they are converted into cash. For federal income tax purposes, redemptions in kind are taxed in the same manner as redemptions made in cash. In addition, sales of in-kind securities may generate taxable gains.

Sales Charges; Sales Charge Reductions and Waivers

Sales Charge on Class A Shares. If you purchase Class A shares of a Fund you will pay an initial sales charge of 5.25% when you invest, unless you qualify for a reduction or waiver of the sales charge. The sales charge for the Funds is calculated as follows:⁽¹⁾

When you invest this amount	Sales Charge as a Percentage of Offering Price ⁽²⁾	Sales Charge as a Percentage of Net Amount Invested ⁽³⁾	Dealer Reallowance
\$0-\$24,999.99 ⁽⁴⁾	5.25%	5.54%	4.75%
\$25,000-\$49,999.99	5.00%	5.26%	4.50%
\$50,000-\$99,999.99	4.50%	4.71%	4.00%
\$100,000-\$249,999.99	3.50%	3.63%	3.00%
\$250,000-\$499,999.99	2.50%	2.56%	2.00%
\$500,000-\$749,999.99	2.00%	2.04%	1.50%
\$750,000-\$999,999.99	1.50%	1.52%	1.00%
\$1,000,000 or more	0.00% ⁽⁵⁾	0.00%	0.50% ⁽⁶⁾

⁽¹⁾ Class A shares are offered and sold at the next offering price, which is the sum of the NAV per share and the sales charge indicated above. Since the offering price is calculated to two decimal places using standard rounding criteria, the number

of shares purchased and the dollar amount of the sales charge as a percentage of the offering price and of your net investment may be higher or lower depending on whether there was downward or upward rounding.

- (2) The underwriter concession will be paid to the Distributor.
- (3) Rounded to the nearest one-hundredth percent.
- (4) The minimum initial investment for Class A shares of a Fund is \$2,500 for non-IRA accounts, and \$1,000 for IRA accounts.
- (5) A 0.50% CDSC is imposed on shares purchased at the \$1,000,000 breakpoint that are redeemed with 12 months of purchase.
- (6) A finder's fee of 0.50% may be paid directly or indirectly by the Adviser to the dealer on investments of \$1,000,000 or more.

Rights of Accumulation. A shareholder may combine a current purchase of Class A shares with other existing Class A and Class C shares currently owned for the purpose of qualifying for the lower initial sales charge rates that apply to larger purchases. The applicable sales charge for the new purchase is based on the total of the shareholder's current purchase and the current NAV of all other Class A and Class C shares owned by the shareholder at the financial intermediary at which he/she is making the current purchase. Shareholders may not aggregate shares held at different financial intermediaries. If the current purchase is made directly through the Transfer Agent, only those shares held directly at the Transfer Agent may apply toward the right of accumulation. A shareholder may aggregate shares that he or she owns and shares that are currently owned by family members including spouses, minor children or parents residing at the same address. Shares held in the name of a nominee or custodian under pension, profit sharing or employee benefit plans may not be combined with other shares to qualify for the right of accumulation. Shareholders must notify the Transfer Agent or their financial intermediary at the time of purchase in order for the right of accumulation to apply. The Funds are not liable for any difference in purchase price if a shareholder fails to notify the Transfer Agent of his or her intent to exercise the right of accumulation, and the Funds reserve the right to modify or terminate this right at any time.

Reinstatement Privilege. If you redeem Class A shares, and within 60 days purchase and register new Class A shares, you will not pay a sales charge on the new purchase amount. The amount eligible for this privilege may not exceed the amount of your redemption proceeds. To exercise this privilege, contact your financial intermediary.

Letter of Intent. By signing a Letter of Intent ("LOI") you can reduce your sales charge on Class A shares. Your individual purchases will be made at the applicable sales charge based on the amount you intend to invest over a 13-month period. The LOI will apply to all purchases of Class A shares. Any shares purchased within 90 days of the date you sign the LOI may be used as credit toward completion, but the reduced sales charge will only apply to new purchases made on or after that date. Purchases resulting from the reinvestment of distributions do not apply toward fulfillment of the LOI. Shares equal to 5.25% of the amount of the LOI will be held in escrow during the 13-month period. If at the end of that time the total amount of purchases made is less than the amount intended, you will be required to pay the difference between the reduced sales charge and the sales charge applicable to the individual purchases had the LOI not been in effect. This amount will be obtained from redemption of the escrow shares. Any remaining escrow shares will be released to you.

Investments of \$1,000,000 or More. There is no initial sales charge on a lump sum Class A share purchase of \$1,000,000 or more, or on any purchase into a Class A account with an accumulated value of \$1,000,000 or more. However, if you have taken advantage of this waiver and redeem your shares within 12 months of purchase, there is a CDSC of 0.50% imposed on such redeemed shares. However, the CDSC will not apply if you are otherwise entitled to a waiver of the initial sales charge as listed in "Initial Sales Charge Waivers," below. Also, the CDSC will not apply if you are entitled to a waiver as listed in "Contingent Deferred Sales Charge Waivers," below. Additionally, all redemptions of Class A shares made within 30 days of purchase are subject to a 0.50% redemption fee.

Initial Sales Charge Waivers. The Adviser may waive sales charges for Class A shares under certain circumstances for some investors or for certain payments. You will not have to pay a sales charge on purchases of Class A shares if you are any of the following persons:

- any affiliate of the Adviser or any of its or the Funds' officers, directors, employees or retirees;
- registered representatives of any broker-dealer authorized to sell Fund shares, subject to the internal policies and procedures of the broker-dealer;
- members of the immediate families of any of the foregoing (*i.e.*, parent, child, spouse, domestic partner, sibling, step or adopted relationships, grandparent, grandchild and UTMA accounts naming qualifying persons);
- fee-based registered investment advisers, financial planners, bank trust departments or registered broker-dealers who are purchasing shares on behalf of their customers;
- financial intermediaries who have entered into agreements with the Distributor to offer shares to self-directed investment brokerage accounts that may or may not charge a transaction fee to their customers;
- retirement (not including IRA accounts) and deferred compensation plans and the trusts used to fund such plans (including, but not limited to, those defined in Sections 401(k), 403(b) and 457 of the Internal Revenue Code and "rabbi trusts"), for which an affiliate of the Adviser acts as trustee or administrator;
- 401(k), 403(b) and 457 plans, and profit sharing and pension plans that invest \$1 million or more or have more than 100 participants;
- current shareholders whose aggregate value of their Class A and Class C accounts exceed \$1,000,000; or
- an individual on certain accounts under investment programs managed by the Adviser.

Federal Income Tax Matters

Each series of the Trust is treated as a separate entity for federal income tax purposes. Each Fund, as a series of the Trust, intends to qualify and elect to be treated as a RIC under Subchapter M of the Code, provided it complies with all applicable requirements regarding the source of its income, diversification of its assets and timing and amount of distributions. Each Fund's policy is to distribute to its shareholders all of its investment company taxable income and net capital gain for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes on amounts distributed. However, neither Fund can assure that its anticipated distributions will be sufficient to eliminate all such taxes at the Fund level. If a Fund does not qualify as a RIC and is unable to obtain relief from such failure, it would be taxed as a corporation and, in such case, it would be more beneficial for a shareholder to directly own the Fund's underlying investments rather than indirectly owning the underlying investments through the Fund.

To qualify as a RIC, a Fund must derive at least 90% of its gross income from "good income," which includes: (1) dividends, interest, certain payments with respect to securities loans and gains from the sale or other disposition of stock, securities or foreign currencies; (2) other income (including but not limited to gains from options, futures or forward contracts) derived with respect to a Fund's business of investing in such stock, securities or foreign currencies and (3) net income derived from interests in qualified publicly traded partnerships. Some Fund investments may produce income that will not qualify as good income for the purposes of this annual gross income requirement. There can be no assurance that a Fund will satisfy all requirements to be taxed as a RIC.

A Fund will be subject to a 4% federal excise tax if it fails to distribute (or be deemed to have distributed) by December 31 of each calendar year (i) at least 98% of its ordinary income for such year; (ii) at least 98.2% of its capital gain net income for the 12-month period ending on October 31 during such year (reduced by any net ordinary losses, but not below the Fund's net capital gain for that period); and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax.

Investment company taxable income generally consists of interest, dividends, net short-term capital gain and net gain from foreign currency transactions, less expenses. Net capital gain is the excess of the net long-term gain from a Fund's sales or exchanges of capital assets over the net short-term loss from such sales or exchanges, taking into account any capital loss carryforward of the Fund. The Funds may elect to defer certain losses for tax purposes. Any future capital losses realized by a Fund in any taxable year may be carried forward indefinitely and will generally retain their character as short-term or long-term.

Distributions of investment company taxable income are taxable to shareholders as ordinary income (for non-corporate shareholders, currently taxable at a maximum federal income tax rate of 39.6%). For non-corporate shareholders, a portion of a Fund's distributions of investment company taxable income may consist of "qualified dividend income" eligible for taxation at the reduced federal income tax rates applicable to long-term capital gains to the extent that the amount distributed is attributable to and reported as "qualified dividend income" and the shareholder meets certain holding period requirements with respect to its Fund shares. For corporate shareholders, a portion of a Fund's distributions of investment company taxable income may qualify for the intercorporate dividends-received deduction to the extent such Fund receives dividends directly or indirectly from U.S. corporations, reports the amount distributed as eligible for deduction and the shareholder meets certain holding period requirements with respect to its shares. The aggregate amount so reported to either non-corporate or corporate shareholders cannot, however, exceed the aggregate amount of such dividends received by a Fund for its taxable year.

Distributions of net capital gain are taxable as long-term capital gain regardless of the length of time shares have been held. For non-corporate shareholders, long-term capital gain is currently taxed at a maximum federal income tax rate of 20%. Distributions of net capital gain are not eligible for "qualified dividend income" treatment or the dividends-received deduction referred to in the previous paragraph.

Distributions of investment company taxable income and net capital gain will be taxable as described above whether received in additional Fund shares or in cash. Shareholders who choose to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date. Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record and paid the following January are taxable as if received on December 31. Distributions are generally includable in alternative minimum taxable income in computing a shareholder's liability for the alternative minimum tax.

Certain individuals, trusts and estates may be subject to a net investment income ("NII") tax of 3.8% (in addition to the regular income tax). The NII tax is imposed on the lesser of: (i) a taxpayer's investment income, net of deductions properly allocable to such income; or (ii) the amount by which the taxpayer's modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). Each Fund's distributions are includable in a shareholder's investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon the sale, exchange or redemption of Fund shares is includable in such shareholder's investment income for purposes of this NII tax.

A sale, exchange or redemption of Fund shares, whether for cash or in kind proceeds, may result in recognition of a taxable capital gain or loss. Gain or loss realized upon a sale, exchange or redemption of Fund shares will generally be treated as long-term capital gain or loss if the shares have been held for more than one year, and, if held for one year or less, as short-term capital gain or loss. However, any loss realized upon a sale, exchange or redemption of shares held for six months or less will be treated as a long-term capital loss to the extent of any distributions of net capital gain received or deemed to be received with respect to such shares. In determining the holding period of such shares for this purpose, any period during which your risk of loss is offset by means of options, short sales, or similar transactions is not counted. Any loss realized upon a sale, exchange or redemption may be disallowed under certain wash sale rules to the extent shares of the same Fund are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the sale, exchange or redemption. If a shareholder's loss is disallowed under the wash sale rules, the basis of the new shares will be increased to preserve the loss until a future sale or redemption of the shares.

Under the Foreign Account Tax Compliance Act ("FATCA"), the Funds may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income, and (ii) distributions of net capital gain and the gross proceeds of a sale, exchange or redemption of Fund shares paid after December 31, 2018 to (A) certain "foreign financial institutions" unless such foreign financial institution agrees to verify, monitor, and report to the IRS the identity of certain of its accountholders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement with the United States), and (B) certain "non-financial foreign entities" unless such entity certifies to the Funds that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. This FATCA withholding tax could also affect a Fund's return on its investments in foreign securities or affect a shareholder's return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in a Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

A Fund's transactions, if any, in forward contracts, options, futures contracts and hedged investments may be subject to special provisions of the Code that, among other things, may accelerate recognition of income to such Fund, defer such Fund's losses, and affect whether capital gain and loss is characterized as long-term or short-term. These provisions could therefore affect the character, amount and timing of distributions to shareholders. These provisions also may require a Fund to "mark-to-market" certain positions (*i.e.*, treat them as if they were closed out). This "mark-to-market" requirement may cause a Fund to recognize income without receiving cash, and the Fund may have difficulty making distributions to its shareholders in the amounts necessary to satisfy the distribution requirements for maintaining the Fund's status as a RIC and avoiding any income and excise taxes at the Fund level. Accordingly, the Funds may have to dispose of their investments under disadvantageous circumstances in order to generate sufficient cash to satisfy the distribution requirements of the Code.

Except in the case of certain exempt shareholders, if a shareholder does not furnish a Fund with its correct Social Security Number or taxpayer identification number and certain certifications or the Fund receives notification from the Internal Revenue Service ("IRS") requiring backup withholding, the Fund is required by federal law to withhold federal income tax from the shareholder's distributions and redemption proceeds at a rate of 28% for U.S. residents.

Foreign taxpayers (including nonresident aliens) are generally subject to withholding tax at a flat rate of 30% on U.S.-source income. This withholding rate may be lower under the terms of a tax convention.

This section is not intended to be a full discussion of federal income tax laws and the effect of such laws on you. There may be other federal, state, foreign or local tax considerations to a particular investor. You are urged to consult your own tax adviser.

Distributions

Each Fund will receive income primarily in the form of dividends and interest earned on such Fund's investments in securities. This income, less the expenses incurred in its operations, is a Fund's net investment income, substantially all of which will be distributed to the Fund's shareholders.

The amount of a Fund's distributions is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board of Trustees. The Funds do not pay "interest" or guarantee any fixed rate of return on an investment in their shares.

A Fund also may realize capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain that a Fund may realize from transactions involving investments held less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any capital loss carryforwards) will be distributed with net investment income. If during any year a Fund realizes a net gain on transactions involving investments held for the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, such Fund will generally have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital loss carryforwards) will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time that the shares may have been held by the shareholder. Net capital losses realized by a Fund may be carried forward indefinitely and will generally retain their character as short-term or long-term capital losses. For more information concerning applicable capital gains tax rates, please consult your tax adviser.

Any distribution paid by a Fund reduces the Fund's NAV per share on the date paid by the amount of the distribution per share. Accordingly, a distribution paid shortly after a purchase of shares by a shareholder would represent, in substance, a partial return of capital (to the extent it is paid on the shares so purchased), even though it would be subject to federal income taxes.

Distributions will be made in the form of additional shares of the Funds unless the shareholder has otherwise indicated. Shareholders have the right to change their elections with respect to the reinvestment of distributions by notifying the Transfer Agent in writing. However, any such change will be effective only as to other distributions for which the record date is five or more business days after the Transfer Agent has received the written request.

Cost Basis Reporting

The Funds are required to report to certain shareholders and the IRS the cost basis of Fund shares when the shareholder sells, exchanges or redeems such shares. This reporting requirement does not apply to shares acquired prior to January 1, 2012 or to shares held through a tax-deferred arrangement, such as a 401(k) plan or an IRA, or to shares held by tax-exempt organizations, financial institutions, corporations (other than S corporations), banks, credit unions and certain other entities and governmental bodies ("non-

covered shares”). The Funds are not required to determine or report a shareholder’s cost basis in non-covered shares and are not responsible for the accuracy or reliability of any information provided for non-covered shares.

The cost basis of a share is generally its purchase price adjusted for distributions, returns of capital, and other corporate actions. Cost basis is used to determine whether the sale, exchange or redemption of a share results in a capital gain or loss. If you sell, exchange or redeem covered shares during any year, then the Funds will report the gain or loss, cost basis, and holding period of such covered shares to the IRS and you on Form 1099.

A cost basis method is the method by which a Fund determines which specific covered shares are deemed to be sold, exchanged or redeemed when a shareholder sells, exchanges or redeems less than its entire holding of Fund shares and has made multiple purchases of Fund shares on different dates at differing net asset values. If a shareholder does not affirmatively elect a cost basis method, each Fund will use the average cost method, which averages the basis of all Fund shares in an account regardless of holding period, and shares sold, exchanged or redeemed are deemed to be those with the longest holding period first. Each shareholder may elect in writing (and not over the telephone) any alternate IRS-approved cost basis method to calculate the cost basis in its covered shares. The default cost basis method applied by the Funds or the alternate method elected by a shareholder may not be changed after the settlement date of a sale, exchange or redemption of Fund shares.

If you hold Fund shares through a broker (or another nominee), please contact that broker or nominee with respect to the reporting of cost basis and available elections for your account.

You are encouraged to consult your tax adviser regarding the application of these cost basis reporting rules and, in particular, which cost basis calculation method you should elect.

Financial Statements

The audited financial statements, accompanying notes and report of the Predecessor Funds’ prior independent registered public accounting firm appearing in the Predecessor Funds’ 2016 Annual Report to Shareholders, are incorporated by reference in this SAI. Financial statements audited by the Funds’ independent registered public accounting firm will be submitted to shareholders at least annually.

Appendix A – Ratings Definitions

Standard & Poor’s Issue Credit Rating Definitions

A Standard & Poor’s issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects Standard & Poor’s view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long term or short term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days—including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long-term ratings.

Short-Term Issue Credit Ratings

A-1

A short-term obligation rated ‘A-1’ is rated in the highest category by Standard & Poor’s. The obligor’s capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitment on these obligations is extremely strong.

A-2

A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitment on the obligation is satisfactory.

A-3

A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

B

A short-term obligation rated ‘B’ is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor’s inadequate capacity to meet its financial commitments.

C

A short-term obligation rated ‘C’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

D

A short-term obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless Standard & Poor’s believes that such payments will be made within any stated grace period.

However, any stated grace period longer than five business days will be treated as five business days. The ‘D’ rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation’s rating is lowered to ‘D’ if it is subject to a distressed exchange offer.

SPUR (Standard & Poor’s Underlying Rating)

A SPUR rating is an opinion about the stand-alone capacity of an obligor to pay debt service on a credit-enhanced debt issue, without giving effect to the enhancement that applies to it. These ratings are published only at the request of the debt issuer/obligor with the designation SPUR to distinguish them from the credit-enhanced rating that applies to the debt issue. Standard & Poor’s maintains surveillance of an issue with a published SPUR.

Dual Ratings

Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, ‘AAA/A-1+’ or ‘A-1+/A-1’). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, ‘SP-1+/A-1+’).

The analyses, including ratings, of Standard & Poor’s and its affiliates (together Standard & Poor’s) are statements of opinion as of the date they are expressed and not statements of fact or recommendations to purchase, hold, or sell any securities or make any investment decisions. Standard & Poor’s assumes no obligation to update any information following publication. Users of ratings or other analyses should not rely on them in making any investment decision. Standard & Poor’s opinions and analyses do not address the suitability of any security. Standard & Poor’s does not act as a fiduciary or an investment advisor except where registered as such. While Standard & Poor’s has obtained information from sources it believes to be reliable, Standard & Poor’s does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives. Ratings and other opinions may be changed, suspended, or withdrawn at any time.

Active Qualifiers (Currently applied and/or outstanding)

Standard & Poor’s assigns qualifiers to ratings when appropriate. This section details active qualifiers.

Standard & Poor’s uses five qualifiers that limit the scope of a rating. The structure of the transaction can require the use of a qualifier such as a ‘p’ qualifier, which indicates the rating addressed the principal portion of the obligation only. Likewise, the qualifier can indicate a limitation on the type of information used, such as “pi” for public information. A qualifier appears as a suffix and is part of the rating.

1. Federal Deposit Insurance Limit: “L” qualifier

Ratings qualified with ‘L’ apply only to amounts invested up to federal deposit insurance limits.

2. Principal Payment: “p” qualifier

This suffix is used for issues in which the credit factors, the terms, or both, that determine the likelihood of receipt of payment of principal are different from the credit factors, terms or both that determine the likelihood of receipt of interest on the obligation. The ‘p’ suffix indicates that the rating addresses the principal portion of the obligation only and that the interest portion is not rated.

3. Public Information Ratings: “pi” qualifier

Ratings with a ‘pi’ suffix are based on an analysis of an issuer’s published financial information, as well as additional information in the public domain. They do not, however, reflect in-depth meetings with an issuer’s management and therefore may be based on less comprehensive information than ratings without a ‘pi’ suffix. Ratings with a ‘pi’ suffix are reviewed annually based on a new year’s financial statements, but may be reviewed on an interim basis if a major event occurs that may affect the issuer’s credit quality.

4. Preliminary Ratings: “prelim” qualifier

Preliminary ratings, with the ‘prelim’ suffix, may be assigned to obligors or obligations, including financial programs, in the circumstances described below. Assignment of a final rating is conditional on the receipt by Standard & Poor’s of appropriate documentation. Standard & Poor’s reserves the right not to issue a final rating. Moreover, if a final rating is issued, it may differ from the preliminary rating.

- Preliminary ratings may be assigned to obligations, most commonly structured and project finance issues, pending receipt of final documentation and legal opinions.
- Preliminary ratings are assigned to Rule 415 Shelf Registrations. As specific issues, with defined terms, are offered from the master registration, a final rating may be assigned to them in accordance with Standard & Poor’s policies
- Preliminary ratings may be assigned to obligations that will likely be issued upon the obligor’s emergence from bankruptcy or similar reorganization, based on late-stage reorganization plans, documentation and discussions with the obligor. Preliminary ratings may also be assigned to the obligors. These ratings consider the anticipated general credit quality of the reorganized or postbankruptcy issuer as well as attributes of the anticipated obligation(s).
- Preliminary ratings may be assigned to entities that are being formed or that are in the process of being independently established when, in Standard & Poor’s opinion, documentation is close to final. Preliminary ratings may also be assigned to obligations of these entities.’
- Preliminary ratings may be assigned when a previously unrated entity is undergoing a well-formulated restructuring, recapitalization, significant financing or other transformative event, generally at the point that investor or lender commitments are invited. The preliminary rating may be assigned to the entity and to its proposed obligation(s). These preliminary ratings consider the anticipated general credit quality of the obligor, as well as attributes of the anticipated obligation(s), assuming successful completion of the transformative event. Should the transformative event not occur, Standard & Poor’s would likely withdraw these preliminary ratings.
- A preliminary recovery rating may be assigned to an obligation that has a preliminary issue credit rating.

5. Termination Structures: “t” qualifier

This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.

Inactive Qualifiers

Inactive qualifiers are no longer applied or outstanding.

1. Contingent upon final documentation: “*” inactive qualifier

This symbol indicated that the rating was contingent upon Standard & Poor’s receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

2. Termination of obligation to tender: “c” inactive qualifier

This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer is below an investment-grade level and/or the issuer’s bonds are deemed taxable. Discontinued use in January 2001.

3. U.S. direct government securities: “G” inactive qualifier

The letter “G” following the rating symbol when a fund’s portfolio consists primarily of direct U.S. Government securities.

4. Provisional Ratings: “pr” inactive qualifier

The letters ‘pr’ indicate that the rating was provisional. A provisional rating assumed the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, made no comment on the likelihood of or the risk of default upon failure of such completion.

5. Quantitative Analysis of publication information: “q” inactive qualifier

A ‘q’ subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.

6. Extraordinary risks: “r” inactive qualifier

The ‘r’ modifier was assigned to securities containing extraordinary risks, particularly market risks, that are not covered in the credit rating. The absence of an ‘r’ modifier should not be taken as an indication that an obligation will not exhibit extraordinary non-credit related risks. Standard & Poor’s discontinued the use of the ‘r’ modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Active Identifiers

1. Unsolicited: ‘unsolicited’ and ‘u’ identifier

The ‘u’ identifier and ‘unsolicited’ designation are unsolicited credit ratings assigned at the initiative of Standard & Poor’s and not at the request of the issuer or its agents.

2. Structured finance: “sf” identifier

The ‘sf’ identifier shall be assigned to ratings on “structured finance instruments” when required to comply with applicable law or regulatory requirement or when Standard & Poor’s believes it appropriate. The addition of the ‘sf’ identifier to a rating does not change that rating’s definition or our opinion about the issue’s creditworthiness.

Local Currency and Foreign Currency Ratings

Standard & Poor’s issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer’s foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

Moody's Credit Rating Definitions

Purpose

The system of rating securities was originated by John Moody in 1909. The purpose of Moody's ratings is to provide investors with a simple system of gradation by which future relative creditworthiness of securities may be gauged.

Rating Symbols

Gradations of creditworthiness are indicated by rating symbols, with each symbol representing a group in which the credit characteristics are broadly the same. There are nine symbols as shown below, from that used to designate least credit risk to that denoting greatest credit risk:

Aaa Aa A Baa Ba B Caa Ca C

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa.

Absence of a Rating

Where no rating has been assigned or where a rating has been withdrawn, it may be for reasons unrelated to the creditworthiness of the issue.

Should no rating be assigned, the reason may be one of the following:

1. An application was not received or accepted.
2. The issue or issuer belongs to a group of securities or entities that are not rated as a matter of policy.
3. There is a lack of essential data pertaining to the issue or issuer.
4. The issue was privately placed, in which case the rating is not published in Moody's publications.

Withdrawal may occur if new and material circumstances arise, the effects of which preclude satisfactory analysis; if there is no longer available reasonable up-to-date data to permit a judgment to be formed; if a bond is called for redemption; or for other reasons.

Changes in Rating

The credit quality of most issuers and their obligations is not fixed and steady over a period of time, but tends to undergo change. For this reason changes in ratings occur so as to reflect variations in the intrinsic relative position of issuers and their obligations.

A change in rating may thus occur at any time in the case of an individual issue. Such rating change should serve notice that Moody's observes some alteration in creditworthiness, or that the previous rating did not fully reflect the quality of the bond as now seen. While because of their very nature, changes are to be expected more frequently among bonds of lower ratings than among bonds of higher ratings. Nevertheless, the user of bond ratings should keep close and constant check on all ratings — both high and low — to be able to note promptly any signs of change in status that may occur.

Limitations to Uses of Ratings*

Obligations carrying the same rating are not claimed to be of absolutely equal credit quality. In a broad sense, they are alike in position, but since there are a limited number of rating classes used in grading thousands of bonds, the symbols cannot reflect the same shadings of risk which actually exist.

As ratings are designed exclusively for the purpose of grading obligations according to their credit quality, they should not be used alone as a basis for investment operations. For example, they have no value in forecasting the direction of future trends of market price. Market price movements in bonds are influenced not only by the credit quality of individual issues but also by changes in money rates and general economic trends, as well as by the length of maturity, etc. During its life even the highest rated bond may have wide price movements, while its high rating status remains unchanged.

The matter of market price has no bearing whatsoever on the determination of ratings, which are not to be construed as recommendations with respect to “attractiveness.” The attractiveness of a given bond may depend on its yield, its maturity date or other factors for which the investor may search, as well as on its credit quality, the only characteristic to which the rating refers.

Since ratings involve judgments about the future, on the one hand, and since they are used by investors as a means of protection, on the other, the effort is made when assigning ratings to look at “worst” possibilities in the “visible” future, rather than solely at the past record and the status of the present. Therefore, investors using the rating should not expect to find in them a reflection of statistical factors alone, since they are an appraisal of long-term risks, including the recognition of many non-statistical factors.

Though ratings may be used by the banking authorities to classify bonds in their bank examination procedure, Moody’s ratings are not made with these bank regulations in mind. Moody’s Investors Service’s own judgment as to the desirability or non-desirability of a bond for bank investment purposes is not indicated by Moody’s ratings.

Moody’s ratings represent the opinion of Moody’s Investors Service as to the relative creditworthiness of securities. As such, they should be used in conjunction with the descriptions and statistics appearing in Moody’s publications. Reference should be made to these statements for information regarding the issuer. Moody’s ratings are not commercial credit ratings. In no case is default or receivership to be imputed unless expressly stated.

*As set forth more fully on the copyright, credit ratings are, and must be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities. Each rating or other opinion must be weighed solely as one factor in any investment decision made by or on behalf of any user of the information, and each such user must accordingly make its own study and evaluation of each security and of each issuer and guarantor of, and each provider of credit support for, each security that it may consider purchasing, selling or holding.

Short-Term Obligation Ratings

Moody’s assigns ratings to long-term and short-term financial obligations. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default.

Moody’s employs the following designations to indicate the relative repayment ability of rated issuers:

P-1

Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term debt obligations.

NP

Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

The following table indicates the long-term ratings consistent with different short-term ratings when such long-term ratings exist.

SHORT-TERM VS. LONG-TERM RATINGS

LONG-TERM RATING	SHORT-TERM CP
Aaa Aa1 Aa2 Aa3 A1 A2 A3 Baa1 Baa2 Baa3	Prime-1 Prime-2 Prime-3
Ba1, Ba2, Ba3 B1, B2, B3 Caa1, Caa2, Caa3 Ca, C	Not Prime

Fitch's National Credit Ratings

For those countries in which foreign and local currency sovereign ratings are below 'AAA', and where there is demand for such ratings, Fitch Ratings will provide National Ratings. It is important to note that each National Rating scale is unique and is defined to serve the needs of the local market in question.

The National Rating scale provides a relative measure of creditworthiness for rated entities only within the country concerned. Under this rating scale, a 'AAA' Long-Term National Rating will be assigned to the lowest relative risk within that country, which, in most but not all cases, will be the sovereign state.

The National Rating scale merely ranks the degree of perceived risk relative to the lowest default risk in that same country. Like local currency ratings, National Ratings exclude the effects of sovereign and transfer risk and exclude the possibility that investors may be unable to repatriate any due interest and principal repayments. It is not related to the rating scale of any other national market. Comparisons between different national scales or between an individual national scale and the international rating scale are therefore inappropriate and potentially misleading. Consequently they are identified by the addition of a special identifier for the country concerned, such as 'AAA(arg)' for National Ratings in Argentina.

In certain countries, regulators have established credit rating scales, to be used within their domestic markets, using specific nomenclature. In these countries, the agency's National Rating definitions may be substituted by the regulatory scales. For instance, Fitch's National Short Term Ratings of 'F1+(xxx)', 'F1(xxx)', 'F2(xxx)' and 'F3(xxx)' may be substituted by the regulatory scales, e.g., 'A1+', 'A1', 'A2' and 'A3.' The below definitions thus serve as a template, but users should consult the individual scales for each country listed on Fitch's regional websites to determine if any additional or alternative category definitions apply.

Limitations of the National Rating Scale

Specific limitations relevant to National Rating scale include:

- National scale ratings are only available in selected countries.
- National scale ratings are only directly comparable with other national ratings in the same country. There is a certain correlation between national and global ratings but there is not a precise translation between the scales. The implied probability of default of a given national scale rating will vary over time.
- The value of default studies for national ratings can be limited. Due to the relative nature of national scales, a given national scale rating is not intended to represent a fixed amount of default risk over time. As a result, a default study using only national ratings may not give an accurate picture of the historical relationship between ratings and default risk. Users should exercise caution if they wish to infer future default probabilities for national scale ratings using the historical default experience with international ratings and mapping tables to link the national and international ratings. As with ratings on any scale, the future will not necessarily follow the past.
- Fitch attaches less confidence to conclusions about national scale default probabilities than for International Credit ratings. There has not been a comprehensive global study of default history among entities with national scales to show that their ex-post default experience has been consistent with ex-ante probabilities implied. This is due to the relatively short history of ratings in emerging markets and the restrictive relative nature of the national scales.

The above list is not exhaustive, and is provided for the reader's convenience. Readers are requested to review the section Understanding Credit Ratings — Limitations and Usage for further information on the limitations of the agency's ratings.

National Short-Term Credit Ratings

F1(xxx)

Indicates the strongest capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Under the agency's National Rating scale, this rating is assigned to the lowest default risk relative to others in the same country. Where the liquidity profile is particularly strong, a "+" is added to the assigned rating.

F2(xxx)

Indicates a good capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. However, the margin of safety is not as great as in the case of the higher ratings.

F3(xxx)

Indicates an adequate capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. However, such capacity is more susceptible to near-term adverse changes than for financial commitments in higher rated categories.

B(xxx)

Indicates an uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Such capacity is highly susceptible to near-term adverse changes in financial and economic conditions.

C(xxx)

Indicates a highly uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

RD: Restricted default

Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Applicable to entity ratings only.

D(xxx)

Indicates actual or imminent payment default.

Notes to Long-Term and Short-Term National Ratings:

The ISO international country code is placed in parentheses immediately following the rating letters to indicate the identity of the National market within which the rating applies. For illustrative purposes, (xxx) has been used.

"+" or "-" may be appended to a National Rating to denote relative status within a major rating category. Such suffixes are not added to the 'AAA(xxx)' Long-Term National Rating category, to categories below 'CCC(xxx)', or to Short-Term National Ratings other than 'F1(xxx).'

LONG-TERM RATINGS

Standard & Poor's Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on Standard & Poor's analysis of the following considerations:

- Likelihood of payment—capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation and the promise we impute.
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

Long-Term Issue Credit Ratings

AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB; B; CCC; CC; and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred, but Standard & Poor's expects default to be a virtual certainty, regardless of the anticipated time to default.

C

An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

D

An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless Standard & Poor's believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

NR

This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

Plus (+) or minus (-)

The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

See active and inactive qualifiers following Standard & Poor's Short-Term Issue Credit Ratings beginning on page A-3.

Moody's Long-Term Obligation Ratings

Long-Term Obligation Ratings

Moody's assigns ratings to long-term and short-term financial obligations. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect the likelihood of a default on contractually promised payments.

Moody's Long-Term Rating Definitions:

Aaa

Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa

Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A

Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa

Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba

Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B

Obligations rated B are considered speculative and are subject to high credit risk.

Caa

Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca

Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C

Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aaa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.*

** By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.*

Fitch's National Long-Term Credit Ratings

AAA(xxx)

'AAA' National Ratings denote the highest rating assigned by the agency in its National Rating scale for that country. This rating is assigned to issuers or obligations with the lowest expectation of default risk relative to all other issuers or obligations in the same country.

AA(xxx)

'AA' National Ratings denote expectations of very low default risk relative to other issuers or obligations in the same country. The default risk inherent differs only slightly from that of the country's highest rated issuers or obligations.

A(xxx)

'A' National Ratings denote expectations of low default risk relative to other issuers or obligations in the same country. However, changes in circumstances or economic conditions may affect the capacity for timely repayment to a greater degree than is the case for financial commitments denoted by a higher rated category.

BBB(xxx)

'BBB' National Ratings denote a moderate default risk relative to other issuers or obligations in the same country. However, changes in circumstances or economic conditions are more likely to affect the capacity for timely repayment than is the case for financial commitments denoted by a higher rated category.

BB(xxx)

'BB' National Ratings denote an elevated default risk relative to other issuers or obligations in the same country. Within the context of the country, payment is uncertain to some degree and capacity for timely repayment remains more vulnerable to adverse economic change over time.

B(xxx)

'B' National Ratings denote a significantly elevated default risk relative to other issuers or obligations in the same country. Financial commitments are currently being met but a limited margin of safety remains and capacity for continued timely payments is contingent upon a sustained, favorable business and economic environment. For individual obligations, may indicate distressed or defaulted obligations with potential for extremely high recoveries.

CCC(xxx)

'CCC' National Ratings denote that default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic conditions.

CC(xxx)

'CC' National Ratings denote that default of some kind appears probable.

C(xxx)

'C' National Ratings denote that default is imminent.

RD: Restricted default.

"RD" ratings indicated that an issuer that in Fitch Ratings' opinion has experienced an uncured payment default on a bond, loan or other material financial obligation but which has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and which has not otherwise ceased business. This would include:

- a. the selective payment default on a specific class or currency of debt;
- b. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation;
- c. the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations either in series or in parallel; or
- d. execution of a distressed debt exchange on one or more material financial obligations.

D(xxx)

'D' National Ratings denote an issuer or instrument that is currently in default.

Notes to Long-Term and Short-Term National Ratings:

The ISO International country code is placed in parentheses immediately following the rating letters to indicate the identity of the National market within which the rating applies. For illustrative purposes, (xxx) has been used.

“+” or “-” may be appended to a National Rating to denote relative status within a major rating category. Such suffixes are not added to the ‘AAA(xxx)’ Long-Term National Rating category, to categories below ‘CCC(xxx)’, or to Short-Term National Ratings other than ‘F1(xxx).’

MUNICIPAL NOTE RATINGS

Standard & Poor's Municipal Short-Term Note Ratings Definitions

A Standard & Poor's U.S. municipal note rating reflects Standard & Poor's opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, Standard & Poor's analysis will review the following considerations:

- Amortization schedule—the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment—the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

See active and inactive qualifiers following Standard & Poor's Short-Term Issue Credit Ratings beginning on page A-3.

Moody's US Municipal Short-Term Debt And Demand Obligation Ratings

Short-Term Obligation Ratings

While the global short-term 'prime' rating scale is applied to US municipal tax-exempt commercial paper, these programs are typically backed by external letters of credit or liquidity facilities and their short-term prime ratings usually map to the long-term rating of the enhancing bank or financial institution and not to the municipality's rating. Other short-term municipal obligations, which generally have different funding sources for repayment, are rated using two additional short-term rating scales (i.e., the MIG and VMIG scales discussed below).

The Municipal Investment Grade (MIG) scale is used to rate US municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels—MIG 1 through MIG 3—while speculative grade short-term obligations are designated SG.

MIG 1

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings

In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of risk associated with the ability to receive purchase price upon demand ("demand feature"). The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade (VMIG) scale. The rating transitions on the VMIG scale, as shown in the diagram below, differ from those on the Prime scale to reflect the risk that external liquidity support generally will terminate if the issuer's long-term rating drops below investment grade.

VMIG 1

This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2

This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

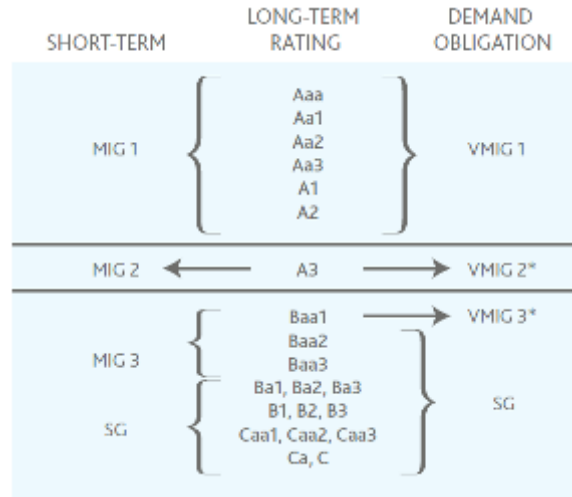

VMIG 3

This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG

This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

US MUNICIPAL SHORT-TERM VS. LONG-TERM RATINGS

*For SBPA-backed VRDBS. The rating transitions are higher to allow for distance to downgrade to below-investment grade due to the presence of automatic termination events in the SBPAs
