Russell 3000 Value TR	-2.82%	6.81%	7.87%	10.71%	7.84%	6.67%

*Performance data quoted represents past performance and does not guarantee future results. Investment returns and principal value will fluctuate, and when sold, may be worth more or less than their original cost. Performance current to the most recent month-end may be lower or higher than the performance quoted and can be obtained by calling 877-766-9363. Performance with Sales Charge reflects the current maximum sales charges of 5.25% for Class A shares and 1.00% contingent deferred sales charge (CDSC) for Class C shares. Class A shares impose a 0.50% maximum deferred sales charge on shares purchased at the \$1 Million breakpoint if redeemed within 12 months of purchase. Class C shares impose a 1.00% CDSC if redeemed within 12 months of purchase. The Fund imposes a 0.50% redemption fee on shares held 30 days or less. Performance data does not reflect the redemption fee for all classes, level sales load for A shares or 1.00% 12b-1 shareholder servicing and distribution fee for C shares. Additionally, performance for the Class A and C Shares without Sales Charge is shown at NAV, and does not reflect the maximum sales charge or CDSC. If reflected, total return would be reduced.*

**Investment Strategy**

Seeking to achieve its investment objective, the Opportunity Fund ("Fund") invests in domestic equity securities, including common and preferred stocks, convertible securities and shares of other investment companies and exchange-traded funds. The Fund may invest in securities of companies of any size. In addition to domestic securities, the Fund may have up to 25% of its net assets invested directly or indirectly in foreign securities, including investments in emerging markets. To the extent deemed appropriate by the Adviser to help mitigate the risks of volatility in the U.S. equity market, the Fund seeks protection of investment principal by using derivative instruments. Through the Fund's use of options, including covered call options, naked put options, bull and bear spread option trades, put options and index options, the Adviser attempts to enhance equity returns relative to a long-only equity strategy and to lower the overall volatility of the Fund's investment portfolio. The Fund's portfolio typically consists of 30 to 50 equity securities that are weighted according to the Adviser's projected return expectations.

**Investment Philosophy**

Snow Capital Management employs a contrarian, fundamental, relative value investment philosophy. We believe that attractive returns can be earned by constructing diversified portfolios of well-managed, financially strong companies where the stock price is depressed because the company has experienced short-to intermediate-term difficulties. The philosophy is consistent with modern behavioral finance research. It attempts to take advantage of investors' overreaction to negative surprises and as a result should avoid overpaying for the crowd's current favorites.

The philosophy relies on independent, fundamental research to determine the nature of the problem, assess the likelihood of a solution, gain confidence that the company has the financial resources to survive the difficulty, and to estimate the likely value of the company's stock after the problem is resolved. Only stocks with the highest potential returns make it into the portfolio. When skillfully executed, this contrarian philosophy should result in a portfolio of stocks with the potential for an asymmetrical payoff. The downside should be minimized because the stock price is already depressed, the company appears to be in sound financial condition, Wall Street's opinion is already negative, and investor expectations are low. The upside potential may be enhanced by the expected earnings turn-around, and more powerfully, the potential expansion of the price-to-earnings ratio that a positive change in investor sentiment can generate after an earnings recovery.

**Industry Allocation\*** as of 03/31/18

**Portfolio Management**
**Richard A. Snow**
**Chief Investment Officer & President**

Richard Snow is the founder, President and Chief Investment Officer of Snow Capital. Richard's investment experience dates back to 1980 when he formed R.A.S. Capital Management, managing private family assets. In 2001, Richard restructured R.A.S. as Snow Capital Management L.P. to attract and retain other quality investment professionals and to grow the firm's account base. Richard holds a B.A. from Duquesne University and an MBA in finance from the University of Pittsburgh.

**Jessica W. Bemer, CFA**
**Portfolio Manager/Senior Analyst/Principal**

Jessica Bemer joined Snow Capital in 2006 as a Senior Analyst. Prior to joining the firm, she worked at Jennison Associates, an institutional asset management firm based in New York, where she served as a member of the equity research team. Jessica was responsible for research coverage of the companies in the consumer discretionary and consumer staples sectors. Jessica is a graduate of Georgetown University.

**Anne S. Wickland, CFA**
**Portfolio Manager/Principal**

Anne Wickland joined Snow Capital in 2006 as a Research Analyst. In 2010, she was appointed a Portfolio Manager of the Small Cap Value portfolio. Prior to joining the firm, she worked at Prudential Equity Group, Credit Suisse and J.P. Morgan where she was responsible for research coverage in the specialty hardlines retail, house-hold and personal care sectors. She is a graduate of Davidson College where she earned a B.A. degree. Anne received her MBA from the NYU Stern School of Business. She is a Chartered Financial Analyst and member of the CFA Institute.

**Important Disclosures**

*The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling 1-877-766-9363 or visiting [www.snowfunds.com](http://www.snowfunds.com). Read it carefully before investing.*

The S&P 500 Index is a broad based unmanaged index of 500 stocks, which is widely recognized as representative of the equity market in general. The Russell 3000 Value TR Index is a market-capitalization weighted equity index maintained by the Russell Investment Group and based on the Russell 3000 Index, which measures how U.S. stocks in the equity value segment perform. You cannot invest directly in an index.

Mutual fund investing involves risk; principal loss is possible. Investments in smaller and micro-cap companies involve additional risks such as limited liquidity and greater volatility. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater in emerging markets. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. The fund may invest in lower-rated and non-rated securities which present a greater risk of loss to principal and interest than higher-rated securities. The fund may invest in other investment companies, and the cost of investing in the Fund will generally be higher than the cost of investing directly in the shares of the mutual funds in which it invests. By investing in the Fund, you will indirectly bear your share of any fees and expenses charged by the underlying funds, in addition to indirectly bearing the principal risks of the funds. The fund also invests in ETFs. They are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact the Fund's ability to sell its shares. The Fund may use options and futures contracts which have the risks of unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of the securities prices, interest rates and currency exchange rates. This investment may not be suitable for all investors.
